|---|---|
| Released Date: | March, 2017 |
| Operative systems: | Microsoft Windows XP<br>Microsoft Windows 7, 10 (32-bit and 64-bit OS)<br>openSUSE 64-bit OS |
| Supported Modules: | M3100A, M3102A, M3201A, M3202A, M3300A, M3302A |
| File Name: | Windows: M3602A_2.01.00_installer.exe<br>Linux: M3602A-2.01.00-x86_64.7z |

## Features

- User-friendly graphical FPGA programming environment

- Streamlined design process:

  - Read-to-use block library

  - Minimizes the need for FPGA-code development

  - Include VHDL, Verilog or Xilinx® VIVADO / ISE projects

  - Include MATLAB/Simulink® code

  - Include Xilinx® CORE Generator IP cores

  - Add and remove built-in resources

- One-click compiling and programming

  - FPGA cloud compiling

  - Hot programming
