

Keysight Onsite Calibration

Minimize downtime by bringing Keysight calibration equipment and expertise to your site

Put your instruments back to work sooner with fast, professional service at your site

- Reduce downtime to hours instead of days with equipment removed only for the time it takes to calibrate.
- Calibrate a range of electronic, physical, dimensional and mechanical test equipment in many countries from many manufacturers during a single visit.
- Plan service around your production and maintenance schedules to minimize impact on your operations.
- Avoid the expense of spare or rental equipment for your test system.
- Save time and money with calibrations that include adjustments, as opposed to those by service providers who must send out-of-tolerance equipment to Keysight for repair.

Get greater measurement confidence from equipment operating with accuracy and precision

- Feel confident in measurement integrity with automated calibrations and adjustments that reduce uncertainty.
- Benefit from the work of Keysight metrologists who guide standards boards and develop the measurement uncertainty calculations used in our calibration procedures.
- Receive the same full battery of calibration tests worldwide, ensuring consistent service for your operations around the globe.
- Lower the risk of making incorrect measurements or shipping faulty products by working with a provider who tests the full number of functions and full range and number of points.
- Ensure your required quality standards are met with a choice of data outputs, including calibrations with measurement uncertainties and guardbanding.

Lower your cost of ownership by utilizing our shared expertise

- Get valuable technical and service knowledge from experts who know your equipment and help you operate it for a greater return on investment.
- Enjoy top-quality calibration and valuable extras—such as preventative maintenance, latest service notes and firmware updates—proven to reduce equipment failures and out-of-tolerance conditions.
- Save time and money by eliminating inbound and outbound shipping and the risk of loss or damage during transit.
- Enhance your product and service experience with free Infoline Web services to request automatic calibration-due notifications and view cal certificates and test data.
- Leverage our ongoing investment in new technology and processes with innovations such as automated diagnosis, adjustments and verification.

Ordering Options

Onsite calibration	Duration	Benefit	Turnaround time
Onsite calibration	One year or multiple years	Onsite calibration to minimize downtime	Hours

Service Description

- Calibrations for a comprehensive range of electronic, physical, dimensional and mechanical test equipment from most manufacturers¹.
- Mobile cal lab at your site at a time and place convenient for you.
- Dedicated Keysight project manager to plan schedules, equipment lists, power requirements, and more.
- Equipment organized by type to minimize setup time and disruption to your business.
- Calibration levels—such as Keysight or accredited calibration—identified prior to service.
- Flexibility to meet changing business circumstances, such as the need to calibrate additional equipment.
- Regular status updates to ensure the project progresses as planned.
- Wrap-up meeting to review service experience and identify areas to improve.

Additional Services Available

- Onsite calibration visits scheduled outside of normal business hours or on holidays.
- Calibration in situ, so instruments do not need to be moved from your bench or factory floor
- Un-racking and re-racking equipment.
- Upgrades to Keysight products as specified by factory service notes.
- Management of repairs through a Keysight service center.
- Onsite repair on selected products identified prior to service¹.

1. Capability varies by country. Please contact Keysight for details.
