

IXIA VISIBILITY SOLUTIONS CASE STUDY

Federal Government

Introduction

This case study of a federal government is based on a September 2016 survey of Ixia visibility solutions customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Ixia visibility solutions:

- Operational challenges Ixia helps solve:
 - Lack of network diagnostics
 - Network blind spots

Use Case

The key features and functionalities of Ixia visibility solutions that the surveyed organization uses:

- Using Ixia solutions for:
 - Forensics and packet capture
 - Resilient inline security tools
- Currently using the following visibility product or feature:
 - Network Taps

Results

The surveyed organization achieved the following results with Ixia visibility solutions:

- Top benefit experienced after implementing Ixia:
 - Improved overall security posture
- Reduced the traffic load on their monitoring or security tools by almost 60% with Ixia's visibility solutions

Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Organization Size:
Federal

Industry:
Government
