M9502A/M9505A AXIe Chassis Driver

1.4.2.1 Version Information

Released Date:	September 2017
Operating Systems:	Microsoft Windows 10
	Microsoft Windows 8.1
	Microsoft Windows 7
	Microsoft Windows XP
Supported Modules:	M9502A 2-Slot AXIe Chassis
	M9505A 5-Slot AXIe Chassis
Requirements:	Keysight IO Libraries Suite
File Name:	modular_M950x_1_4_2_1.exe

Changes from Previous Version

- Added support for Windows 8.1 and Windows 10.

- Changes to allow AXIe chassis to be detected correctly in Keysight IO Libraries when modules with multiple PCIe endpoints are inserted in the chassis.

TECHNOLOGIES

1.3.115.0 Version Information

Released Date:	March 2015
Operating Systems:	Microsoft Windows 7
	Microsoft Windows XP
Supported Modules:	M9502A 2-Slot AXIe Chassis
	M9505A 5-Slot AXIe Chassis
Requirements:	Keysight IO Libraries Suite
File Name:	modular_M950x_1_3_115_0.exe

Changes from Previous Version

- Visual Studio Examples updated to version 2010. Document changes to meet IVI-2014 Compliance.

- Rebranded with Keysight name and copyrights.

- Changes made to support the HP Z440/640/840 series of controllers.

1.2.1.6 Version Information

Released Date:	May 2012
Operating Systems:	Microsoft Windows 7
	Microsoft Windows XP
Supported Modules:	M9502A 2-Slot AXIe Chassis
	M9505A 5-Slot AXIe Chassis
Requirements:	Keysight IO Libraries Suite
File Name:	M950x_Setup.exe

Changes from Previous Version

- Increased the chassis fan speed resolution by expanding the range of fan speed levels from 8-15 to 35-100. The minimum/maximum fan RPMs remain the same as before, they are just mapped into the expanded range of fan speed levels accessible from the Soft Front Panel and programmatically. Use of the expanded fan speed ranges requires chassis firmware version 1.3.23 or later.

- Added support for Agilent IO Libraries 16.2. Agilent Connection Expert now displays the chassis and all installed modules under the PXI0 interface.

- On 64-bit systems, the Agilent IO Libraries version 16.2 32-bit mDNS responder patch will be installed automatically. Previous versions of the AXIe chassis software required a separate download and install of this patch to allow 32-bit applications to resolve LAN hostnames correctly on 64-bit systems.

1.1.1.1 Version Information

Released Date:	May 2011
Operating Systems:	Microsoft Windows 7
	Microsoft Windows XP
Supported Modules:	M9502A 2-Slot AXIe Chassis
	M9505A 5-Slot AXIe Chassis
Requirements:	Keysight IO Libraries Suite
File Name:	modular_M950x_1_1_1.exe

Description

- Initial release.
