

# Best Practices Review

Moving towards ongoing effective development

# Evaluating Test Automation Processes with Specialist Guidance

As teams shift and change, it can become difficult to get an overarching view of whether best practices are being followed. Introducing Keysight's "Best Practices Review", an engagement to assess the quality of your current test automation processes. Usually conducted remotely, our team evaluates your overall alignment to Keysight's Eggplant Software standards.

This review is an opportunity to take a step back and gain clarity on your current position, ahead of making improvements.

## Reviewing processes against best practices in ten quality categories

When time pressures mean you're racing from one sprint to the next, testing quality can suffer. Eggplant's Service Delivery Architect will interview your team to conduct a full and clear assessment of your current processes.

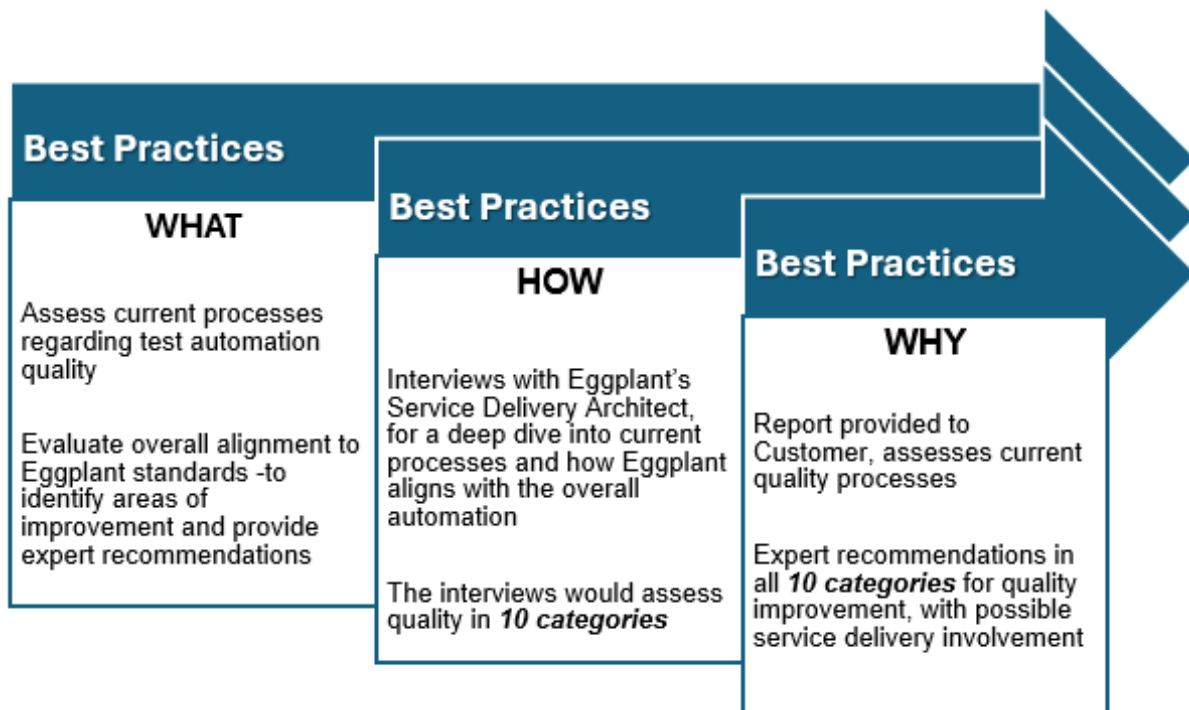

**Figure 1.** The Best Practices Review covers ten quality categories.

## Identifying key areas for improvement

Keysight's assessment of your test automation processes is designed to give you an overview, allowing you to see where best practices are being followed and where there is scope to improve.

You'll receive a report outlining your assessment and providing expert recommendations for quality improvements in all ten categories.

**Figure 2.** The review follows a thorough evaluation process that leads to specific recommendations for improvement.

## Critical insights from experienced service delivery architects

With any assessment, reviewing and prioritizing recommendations is important, enabling you to make improvements in critical areas. Keysight's Eggplant Software Best Practices Review is designed to give you the insights you need to start refining your processes, leading to increased efficiency and quality in your software testing teams.

# Implementing key recommendations to increase test automation quality

As your organization approaches new challenges in a changing world, implementing the report’s recommendations creates a solid foundation for you to operate from as you work towards current goals. After your review, there is the option to implement the recommendations internally or to engage Keysight’s Eggplant Software specialists to assist you in addressing the areas where there is scope for improvement.
