

Consultancy Services

Quality management from Keysight for Eggplant software test automation to help improve, prevent and detect

Addressing Test Automation Headaches Quickly with Specific Strategic Support

Efficient software test automation is a critical part of driving business success, so when challenges arise they need to be solved fast. Consultancy Services from Keysight Eggplant can rise to any test automation challenge, from simple scripting to providing drop-in support with strategy, processes, advanced feature adoption (commonly modeling, CI/CD), sprint attendance or complex technical guidance.

Dynamic, flexible support from an Eggplant certified Implementation Architect

We recognize that service requirements are dynamic. Consultancy Services provides you with options to choose the extent of support required, providing you with the freedom to align our expertise with your requirements. Our highly skilled consultants are experienced at working and communicating with teams and leaders at every level, and can work alongside your architect, project manager, technical team and test engineers.

Consultancy services: Introducing excellence, resetting challenging projects and providing technical oversight

Whether you need ad-hoc strategic support or assistance with a failing project that needs to be put back on track, Eggplant's consultants have the broad and specialist skill set required. It may be that you need technical oversight of one of your suppliers, or you wish to set up a test automation center of excellence. Eggplant's Consultancy Services can take on these challenges and more, from coaching, mentoring and training through to engineering, design and architecture, reviewing best practices and strategy guidance.

Your Eggplant Certified Senior Test Automation Engineer

Every Eggplant Implementation Architect is a subject matter expert, having setup and managed test automation business units, is certified by the International Software Testing Qualifications Board, and leads our test automation projects. Working methods can flex to suit your requirements, from joining your team on a regular cadence, to supporting a sprint, or providing on-demand support.
