

Test Automation as a Service

Accelerate and scale your test automation team

Test Automation as a Service (TAaaS) from Eggplant offers a streamlined delivery approach to organizations that wish to outsource their test automation without losing control of quality. TAaaS takes away the pain of creating, hosting, maintaining, and running tests whilst allowing QA teams to keep operational costs low and improving time management. Eggplant's team of experts will also help speed up product delivery and efficiency with best QA practices and cutting-edge testing automation tools.

“We worked closely with Eggplant on the development and implementation of the new architecture needed to support our remote testing goals, and the support team was incredibly helpful throughout the process ...”

Di Ruzza, Test Architect, Nationwide

Why choose Test Automation as a Service?

A shortage of skilled QA Engineers, high fixed operational costs and short delivery dates are some of the reasons why organizations choose to outsource their QA operations. Regardless of the reasoning, Eggplant offers a customizable & flexible approach to suit present and future needs.

- **Why automated testing?** Automated testing eliminates human error, creates consistency in tests and is a lot faster than manual testing.
- **Why outsource test automation?** Test automation can be time-consuming & expensive; Eggplant can deliver faster & better results while keeping the costs low.
- **Why invest in TAaaS?** By choosing Eggplant TAaaS, the value of the investment is never lost, whether choosing to continue using Managed Services or deciding to bring Eggplant in-house.

Test Automation as a Service benefits

In the fast-paced realm of software development, staying competitive demands accelerated testing without compromising quality, though the journey to get there as quickly and effectively as possible can be daunting. Care for Eggplant Software addresses this challenge by offering the profound knowledge and skills of our experienced automation consultants.

Lightning ROI

Accelerate product delivery and efficiency with Eggplant's cutting-edge tools and best QA practices

Great user experience

Deliver the best possible experience to users with expert advice from the best QA engineers in the industry

Transferable lifetime value

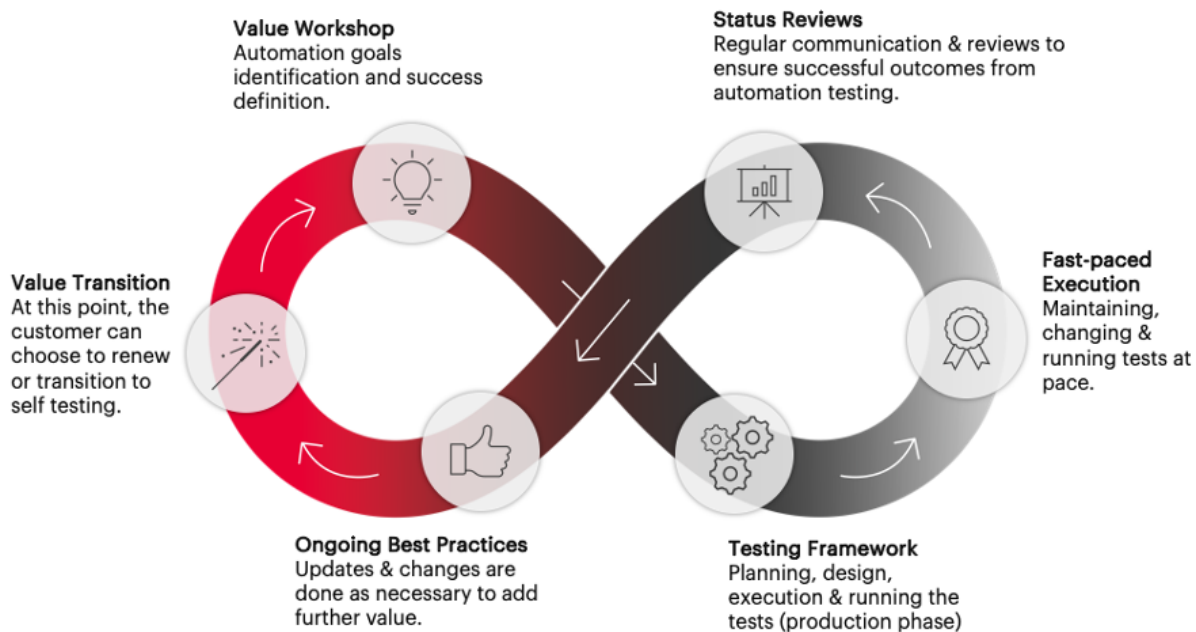

Never lose value gained from Eggplant with the option of a seamless transition from TAaaS to in-house automation

What do we deliver?

Test Automation as a Service delivers tailored test automation services to help customers get to market quickly and profitably. Our process begins with an assessment of the organization's needs and goals, followed by the creation, execution, and reporting of tests.

Dedicate time to other tasks with TAaaS

Endless value transition

One of the core beliefs of Keysight is to add value to customers' lives through quality transformation. With Test Automation as a Service, customers can rest assured the value gained is never lost regardless of changes in circumstances. Once the customer reaches the Value Transition checkpoint, they can either choose to continue subscribing to TAaaS or have Eggplant's QA engineers migrate the tests created thus far.

This could be the case for an organization that needed to outsource test automation for a few years but later decided to expand their QA team and carry out the testing themselves. For each use case, Eggplant offers a tailored solution within managed services, including a Guided Adoption program, onboarding, training and 24/7 support.

Fast-track your digital transformation to AI-Driven Automated Testing

QA Teams challenged with the demands of CI/CD release schedules require accelerated testing to meet deadlines. While automation has promised to address demanding schedules, how can you successfully transition and scale simultaneously?

With Test Automation as a Service from Eggplant as your partner, you can benefit from the experience and expertise of our test automation engineers whilst freeing up time for your team to focus on other tasks.

Description	Details
