

# Keysight One-Stop Solution Plans

Manage 100% of your instrument service requirements regardless of instrument brand

## Keysight simplifies management of calibration and repair service for all your test equipment

Multi-vendor inventories are common in most industries and company labs today. Developing products in a fast moving environment requires a comprehensive instrument plan to match. To ensure they operate at optimum efficiency, Keysight Technologies, Inc. one-stop solutions will manage your complex multi-vendor environment business by:

- Simplified management through one contract instead of multiple contracts and vendors
- Consistent quality delivered worldwide
- Reduced operating costs
- Accountability for calibration management
- Access to a global network with local engineers
- Online Instrument Management tools which provides complex information for your equipment

	Third-party	Keysight
<b>Thorough testing</b> Based on available procedures, Keysight measures the actual performance of your Keysight instruments for every specification and every option—every time		
<b>Accurate measurements</b> Our measurement procedures and equipment ensure high accuracy (or “low uncertainty” in metrology terminology). There’s no point in measuring instrument performance unless the measurements are accurate!		
<b>Scope of Accreditation (Keysight.com/find/accreditation)</b> All Keysight service centers are accredited to ISO 17025. And, each Scope of Accreditation features a comprehensive list of measurement parameters and their associated uncertainties.		
<b>Turnaround time (TAT)</b> Many third-party providers send OOT instruments to us for repair when only adjustments are needed. This can turn into delays—often twice the quoted TAT—and extra cost for you.		

Keysight manages 100% of the calibrations for your business by understanding technically how to support high-end products in a multivendor environment. If we can't do it, we'll tell you!

## One-stop solutions: Instrument calibration and repair

Keysight will increase instrument utilization and lower cost of ownership by developing a custom repair and calibration solution for your facility.

Our experience and resources in the test and measurement business provide us the knowledge and skill to develop testing for non-Keysight instrument and devices.

Keysight custom delivery solutions maximize uptime and minimize management costs:

	Service center	Volume on-site calibration	On-site system uptime	Resident professional
Total cost of ownership elements	Send your instruments to Keysight for predictable fast service and expert restoration to full functionality	Maximize uptime by bringing the same Keysight equipment and processes used at Keysight Service Centers to your site	Keep your systems, such as ParBERT and antenna test systems, up and running without ever moving them	Keep your equipment operating almost non-stop with a Keysight professional assigned to your site
Technology roadmap sharing for CapEx planning				•
CapEx optimization for procurement and utilization			•	•
Increased system availability			•	•
On-site Keysight engineers		•	•	•
Metrology standards and audit compliance	•	•	•	•
Instrument tracking	•	•	•	•
Logistics management	•	•	•	•
Keysight calibration and/or repair service	•	•	•	•

### KEYSIGHT SERVICES

Accelerate Technology Adoption. *Lower costs.*
