

Core Software

Accelerate Your Innovation

Keeping Up Our Commitment to You

The electronics industry moves quickly, which means you have to innovate faster than ever before. It's our job at Keysight to keep up with the pace of your innovations. We aim to accelerate your time to market by supplying the features you need when you need them. We do this by consistently adding new features and enhancements to our instrument Core Software, allowing you to make more measurements with the same hardware. Our goals are to provide you with enhanced instrument capabilities more frequently, to future-proof your investment, and to enable you to outpace technological evolutions.

Enhanced instrument capabilities

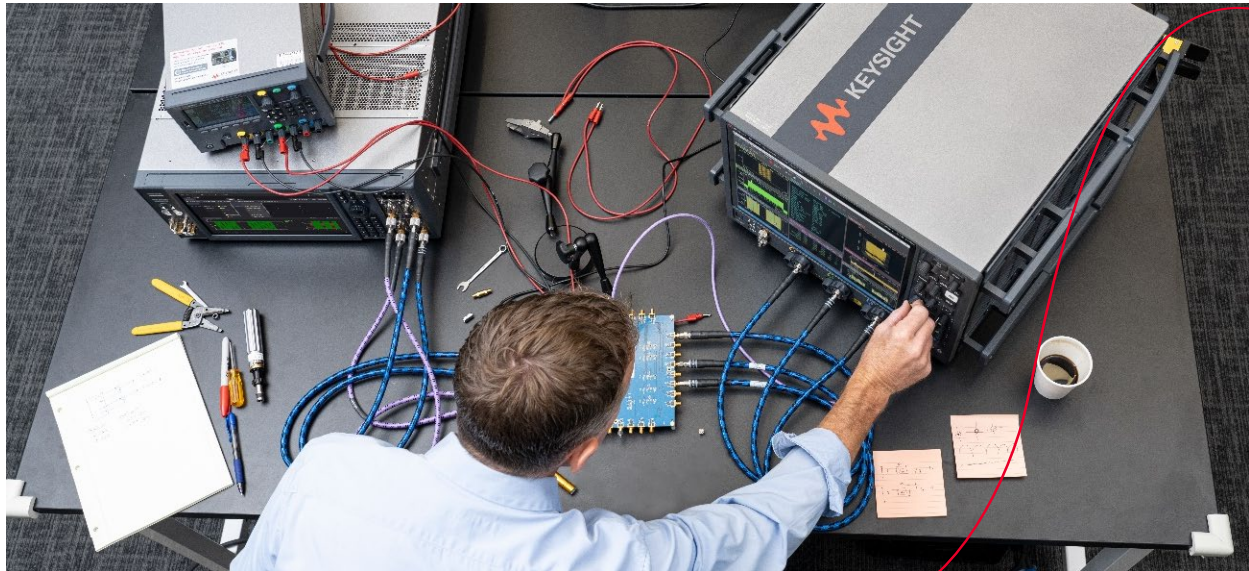

Core Software unlocks the full potential of your hardware, providing you the measurement tools, analysis capabilities, and features required to meet the ever-increasing needs of electronics applications. It provides faster and deeper insights into your designs to accelerate your time to market.

Future-proof your investment

Future-proofing is important because new developments in measurement techniques and analysis capabilities are continually evolving due to new technology waves and advancements. With Core Software subscription, you are able to update your hardware for enhancements that help you evolve with the industry without new equipment procurement. By keeping the Core Software subscription current, you will always have the latest features and capabilities on Keysight oscilloscopes, vector network analyzers, signal analyzers, and signal generators.

Keeping pace with technology evolutions

Lastly, Keysight is committed to keeping pace with technology evolutions by increasing our Core Software release cadence. We will provide consistent and reliable Core Software enhancements and updates to keep up with the speed of development. Get results and insights that you can trust from the perfect combination of industry-leading hardware and feature-rich Core Software.

By consistently adding features and enhancements to an instrument's Core Software, we can help accelerate your time-to-market and future-proof your hardware investment. Keysight's Core Software provides the measurement and analysis capabilities you expect, giving you the latest testing capabilities you need when you need them.

Core Software subscription plan

Core Software unlocks the full potential of your hardware, providing the measurement tools, analysis capabilities, and features required to meet the ever-increasing needs of your applications. Core Software is included for the first year (12 months) of purchase and includes access to updates and enhancements. The Core Software Updates and Enhancements plan is available for 3 years (36-months) or 5 years (60-months) subscription and can be renewed for a fee after initial purchase.

Migration path is available to include Core Software subscription for your installed-base instruments. Please contact to your Keysight representative for more detail.
