

Save 20% on Boundary Scan Smart Plugin Cards

Reduce Test Costs and Protect Valuable Hardware with Boundary Smart Plugin Cards

Protect Hardware and Reduce Test Costs

Boundary Scan Test Smart Plugin Cards provide a practical and cost-effective alternative to using actual DIMM and PCIe devices during board-level testing. Designed to emulate installed DDR4, DDR5, and PCIe modules, these plug-in test cards help manufacturers perform validation and production testing without consuming valuable production hardware.

By Replacing Actual Components during Tests, Manufacturers Can:

Reduce Test Costs

Replace costly DDR4, DDR5, and PCIe devices with purpose-built test modules while maintaining effective test coverage.

Minimize Hardware Risk

Avoid repeated handling of production components and reduce the risk of connector or device damage during testing.

Enhance Test Coverage

Leverage boundary scan technology for improved access to signal, power, and ground paths that are difficult to verify with standard peripherals.

Streamline Test Operations

Simplify test setup, accelerate execution, and eliminate the need for component initialization or functional verification before testing.

Limited-Time Promotion: 20% Off Boundary Scan Test Smart Plugin Cards

Take advantage of our special promotion and receive 20% off selected Boundary Scan Smart Plugin Cards, helping you expand test coverage while reducing operating costs.

Eligible Products

Part Number	Quantity	Description
N11251A-D14	Pack of 50	Boundary Scan DDR4 Smart Plugin Card
N1125A-D15	Pack of 100	
N1125A-D24	Pack of 50	Boundary Scan DDR5 Smart Plugin Card
N1125A-D25	Pack of 100	
N1125A-D44	Pack of 50	Boundary Scan PCIe Smart Plugin Card
N1125A-D45	Pack of 100	

Promotion Details

Start date: June 1, 2026

End date: May 31, 2027

Availability: Worldwide

To Take Advantage of this Promotion

Contact your local Keysight representative to learn more about this promotion and determine the right Boundary Scan Test Module Card configuration for your test environment.
