Agilent Technologies

Agilent Medalist i5000 06.02pe Software Package

Software Release Date: December, 2007
System Requirements: Agilent Medalist i5000 test systems or Test Development PC
Controller Requirements: Windows PC
Operating System: Microsoft® Windows® XP SP2
Software Requirement: Agilent Medalist i5000 06.02p
Patch Requirement: NA

This Software Patch may be installed only on MS Windows systems with i5000 06.02p software release. It can be installed on systems with i5000 Test System Software or i5000 Development Software.

The installer will automatically check for 06.02sa, 06.02sb, 06.02sc, 06.02sd site specific patches and automatically uninstall them if they are present in the system.

The Software Update must be installed by the administrator login (or a login with administrator privileges).

If you have any previous ScanWorks version installed on your machine. Please uninstall them prior to installing 06.02p/06.02pe.

To install the 06.02pe Software Update on Windows systems running the i3070 software:

1. Save Agilenti5000_0602pe.exe file to disk.

2. Close all open programs.

3. Go to the directory in which the file was saved and Double-click on Agilenti5000_0602pe.exe.

4. Follow the Install Shield instructions for installation.

5. To validate that the software installed correctly, bring up a Korn Shell window. On the menu bar, click START then click Programs then click Agilent ICT then click Korn Shell. In the Korn Shell window, type version and return. The software revision "Patch i5000 06.02pe 0606 WN. released on December 2007"should display at the end of the output.

6. Delete the Agilenti5000_0602pe.exe.

Agilent Medalist i5000 06.02pe Software Release Bulletin

This is a Software Patch for Agilent Medalist i5000 06.02p for Windows.

You must already have version i5000 **06.02p** on your computer before you install the 06.02pe software patch.

If you have any previous ScanWorks version installed on your machine. Please uninstall them prior to installing 06.02p/06.02pe.
