TECHNOLOGIES

(Earlier) Version Information

Released Date:	31 May, 2012
Software Revision	01.20.00
File Name:	DSO1KB_1GSa.AGL

Oscilloscope Software Version 01.20.00
Release Date: May 31, 2012
File Name: DSO1KB_1GSa.AGL

Version 01.20.00 of the oscilloscope software includes the items below:
After updating software, please perform a self calibration once instrument has warmed up (running for 30 minutes). This operation can be found in UTILITY -> SELF-CAL

<u>Behavior and Usability Improvements</u>

- Thumb drive behavior is improved.
- Counter will turn back on when exiting XY mode, if on when entering.
- Default Setup will now clear the printer status information.
- The DISPLAY -> Clear softkey action now more quickly erases the MATH waveform
- Default Setup now resets all menus to top menu level
- Math now will conform to the 'Expand about' preference setting, just like the channels

The following product SW issues are now corrected
- Tracking cursors on FFT waveform now work appropriately when in split screen display
- The front panel will now unlock when USB connection is removed
- Several plotting issues have been improved
- Peak detect is improved on Channel2 when at slow sweep speeds
