Option FP1, Fast Power, Up to 25 MHz Bandwidth Upgrade; Option FP2, Fast Power, Up to 40 MHz Bandwidth Upgrade

Products Affected:	N9010A, EXA Signal Analyzer N9020A, MXA Signal Analyzer N9030A, PXA Signal Analyzer
Serial Numbers:	All
To Be Performed By:	(X) Agilent Service Center (X) Personnel Qualified by Agilent (X) Customer
Estimated Installation Time:	0.5 Hours
Estimated Adjustment and Verification Time:	N/A

Introduction

This installation note explains how to install the license necessary for Options FP1 and FP2. These are license key-only kits that add Fast Power measurements for up to 25 MHz bandwidth (FP1) or up to 40 MHz bandwidth (FP2).

For Option FP2, the analyzer must already have Option B40, 40 MHz Analysis Bandwidth, installed.

IMPORTANT	Do not install the Option FP2 upgrade kit unless Option B40, 40 MHz Analysis Bandwidth is already installed. To verify this, press System, Show, System and check the list of installed options.
------------------	---

If the analyzer does not already have the necessary hardware and licenses to provide analysis bandwidths required, other upgrade kits are available. Refer to the appropriate upgrade web page below and the bandwidth upgrade wizard.

NOTE

1. Instrument software revision A.14.01 or later is required to install this upgrade. The latest revision of X-Series Signal Analyzer software may be downloaded from http://www.agilent.com/find/xseries_software
 2. This option is licensed for one instrument model/serial number combination. The license key will only install on the designated instrument.

Option FP1, Fast Power, Up to 25 MHz Bandwidth Upgrade; Option FP2, Fast Power, Up to 40 MHz Bandwidth Upgrade

Contents

Quantity	Description	Agilent Part Number
1	Installation Note	This note
1	Option Upgrade Entitlement Certificate	5964-5178
1	Entitlement Certificate Envelope	5967-7169

Tools Required

- ☐ Personal computer with internet access and USB port
- ☐ USB storage device with >2GB free memory

Initial Instrument Functionality and Configuration Check

1. Power on the instrument and allow the instrument to boot up and display a measurement screen. (The instrument will probably display a spectrum analyzer screen and you will see the instrument sweeping.)
2. On the analyzer, verify that there are no errors displayed in the STATUS line in the lower right corner of the display.
3. Press **System, Show, Errors** and verify that there are no errors in the error queue.
4. If there are errors or any alignment failures, investigate and fix the problem before continuing.
5. Press **System, Show, System**.
6. If you are installing N9010AK-FP2, verify that N9010A-B40 is currently installed.
7. If you are installing N9020AK-FP2, verify that N9020A-B40 is currently installed.
8. If you are installing N9030AK-FP2, verify that N9030A-B40 is currently installed.

Installation Procedure over USB

1. Locate the Option Upgrade Entitlement Certificate (5964-5178) from the kit.
2. Redeem the Option Upgrade Entitlement Certificate by following the instructions on the Certificate.
3. After redeeming your Option Upgrade Entitlement Certificate you will receive an email with an attached License File.
4. Locate a USB storage device. Perform a virus scan on this device before use.
5. Save the License File to the root directory of the USB Storage Device.
6. Connect the USB Storage Device to the signal analyzer USB port. Windows will detect the new hardware and may display the configuration menu shown in [Figure 1](#). This menu may be configured according to your preferences.

Figure 1 USB Storage Device Configuration Menu

7. The signal analyzer will automatically consume the License File. (This may take a few minutes) When the License File is consumed the Agilent License Manager will display a “Successful License Installation” message as shown in [Figure 2](#).

Figure 2 Successful License Installation

Option FP1, Fast Power, Up to 25 MHz Bandwidth Upgrade; Option FP2, Fast Power, Up to 40 MHz Bandwidth Upgrade

Alternate Installation Procedure

The License File can be manually installed over USB or LAN by placing the license file in the following folder on the signal analyzer

C:\Program Files\Agilent\licensing

Verify the Installation

1. Cycle power on the signal analyzer.
2. Press **System, Show, System** to display a list of installed options.
3. Verify that the newly installed option number(s) appears on the list.

Functional Test

The Fast Power features are only available remotely. From the front panel, it is sufficient to verify that the option is listed in the Show System screen.

1. Press **System, Show, System**.
2. Verify that “Fast Power Measurements, up to 25 MHz bandwidth” (for FP1) or “Fast Power Measurements, up to 40 MHz bandwidth” (for FP2) appears in the list of option descriptions.
