# Keysight Technologies, Inc. Statement on Removal of User Data When Using Product Security Documents and Procedures

Keysight Technologies provides security information for over 2000 of our active and obsolete products. Security information is available at: Keysight Instrument Security - Documents of Volatility.

The security information provided for a specific Keysight product includes details on memory and its usage, and when appropriate, procedures for sanitizing or removing memory that may contain user data. Keysight certifies that properly following the documented procedures removes all user data from the product.

Should you have further questions, please contact Keysight.
