

## Front Panel USB Port Firmware Update Instructions

1. Download the firmware file from K.com webpage and perform copy to a USB drive.
2. Remove the USB drive from the PC and insert it in the DMM front panel USB port.
3. Begin firmware update by pressing: Shift > Utility > Test/Admin > Firmware Update

4. Press **Yes** to continue with the firmware update. The update process will start automatically.
5. The firmware update process is complete after the DMM rebooted.
6. Press Shift > Utility > Help > About to check the firmware revision updated is correct.
