

The CX3300 series Device Current Waveform Analyzer

The top 6 new features of firmware 2.0

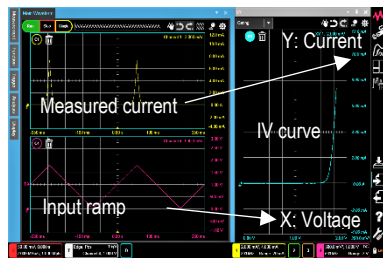

The new CX3300 series Device Current Waveform Analyzer firmware, version 2.0, is now available for download.

You can download the latest firmware from [here](#).

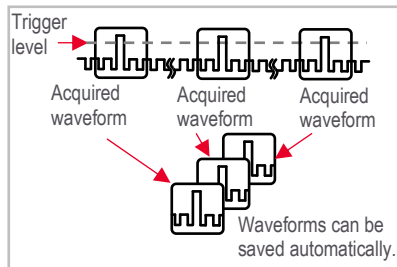

In addition to supporting new CX1104A selectable shunt current sensor and CX1105A Ultra-low noise differential sensor, the new firmware includes the powerful new features and enhancements as below.

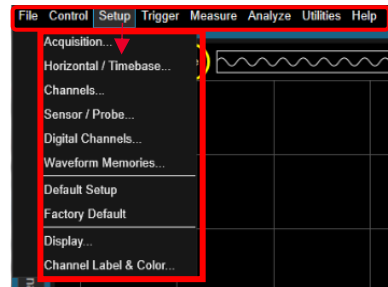

XY Analysis to display the relationship between two waveforms

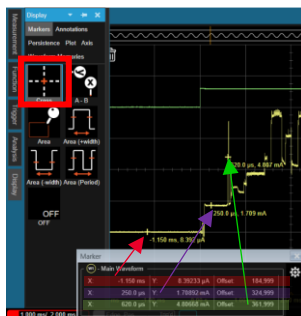

Auto Save to save rarely occurring waveforms automatically

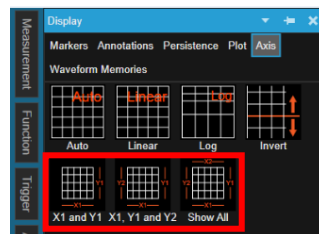

Menu Bar for easy access to each dialog box

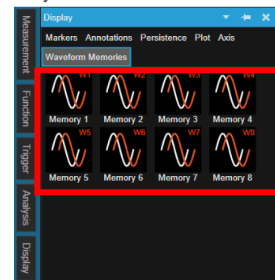

Waveform tracking mode of cross marker

Secondary X Axis and Secondary Y Axis to display the scales of two waveforms on the same graph

Drag & drop menu for Waveform memory
