

Keysight M8194A Arbitrary Waveform Generator

Version 1.2.5.0 Information

Released Date:	11 March 2019
Operating System:	<ul style="list-style-type: none">• Windows 10 (32 bit or 64 bit)• Windows 8.1 (32 bit or 64 bit)• Windows 8 (32 bit or 64 bit)• Windows 7 (32 bit or 64 bit)
Hardware Revision:	1.0
File Names:	<ul style="list-style-type: none">• M8194_Setup.exe

New Funktionalität

- Asynchronous SCPI command added to start waveform generation: "INITiate:ASYNc"

Bug Fixes

- Improved skew stability. Probability for skew variation strongly reduced.
- Maximum bitrate on serial data panel increased to 120 Gbaud

Known Issues

- **Skew stability**
Changing the sample rate or power cycling the instrument can occasionally lead to a change in skew between channels. Even though the probability is very low, we recommend to perform an in-system calibration after every change of sample rate or power cycle. The skew between channels never changes due to a new waveform download or run/stop command.

Version 1.0.10.0 Information

Released Date:	25 October 2018
Operating System:	<ul style="list-style-type: none">• Windows 10 (32 bit or 64 bit)• Windows 8.1 (32 bit or 64 bit)• Windows 8 (32 bit or 64 bit)• Windows 7 (32 bit or 64 bit)
Hardware Revision:	1.0
File Names:	<ul style="list-style-type: none">• M8194_Setup.exe

Initial Release

Known Issues

- **Skew stability**
Changing the sample rate or power cycling the instrument can occasionally lead to a change in skew between channels. Even though the probability is very low, we recommend to perform an in-system calibration after every change of sample rate or power cycle. The skew between channels never changes due to a new waveform download or run/stop command.
