

IxNetwork—Converged Data Center Ethernet Test Solution

Validate Your Converged Data
Center Ethernet Fabric

Problem: Data Center Expansion with Unified Networks Introduces New Failure Points

To capture the efficiency and cost-savings promises of cloud computing, server virtualization, and data center consolidation, organizations need highly flexible, scalable, and low-latency data center architectures. Data center operators converging LANs and SANs onto a single unified fabric need to ensure a lossless transport layer by consolidating and optimizing their networks. But each new and multiple-domain technology required to realize seamless server virtualization, converged storage, and cloud federation brings complexity and failure points. To ensure quality in these converged data center Ethernet networks, each new technology must be thoroughly tested in a silo, then validated end-to-end as a whole system, prior to deployment.

Solution: A Comprehensive Data Center Ethernet Test Solution for a Converged Data Center

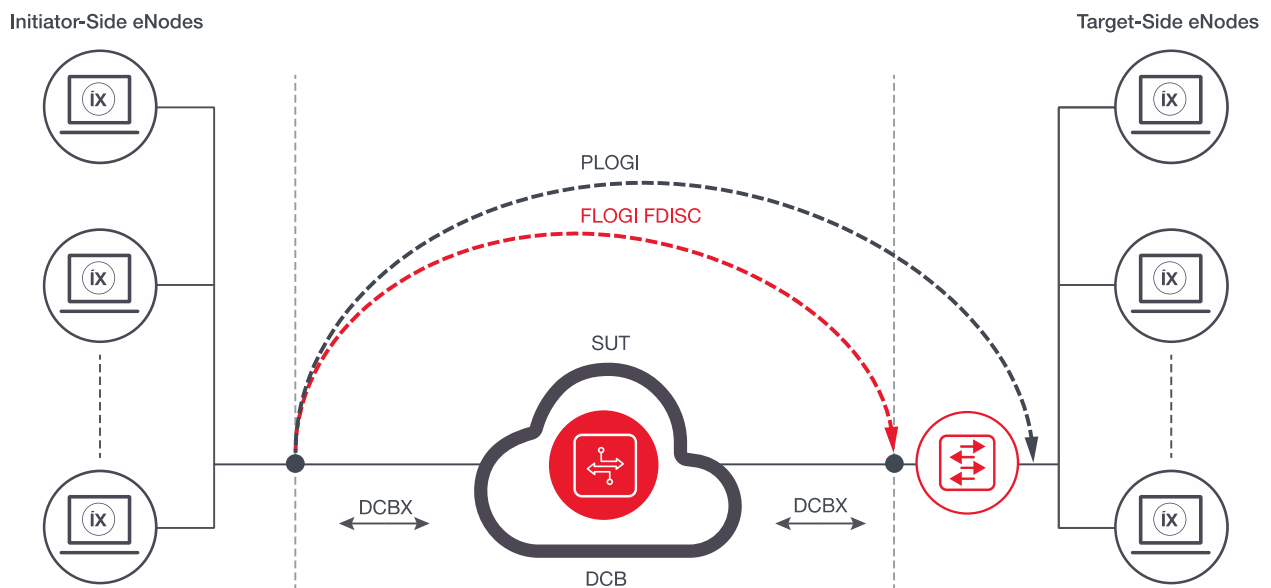

Keysight's IxNetwork Data Center Ethernet test solution covers technologies from Storage Area Network (SAN) migration to Ethernet, to data center consolidation with Layer 2 Multi-Path (L2MP), to virtualization overlay technologies for server virtualization. It enables users to emulate various network components to test converged data center networks from end to end.

Highlights

- Validate the consolidation and convergence of Fibre Channel and Ethernet into a unified fabric for energy-efficient, high-performing data centers
- Qualify the Layer 2 Ethernet infrastructure with active-active multipath to support highly scalable and highly redundant next generation data center fabric
- Benchmark DUT forwarding performance for delivering converged data center traffic
- Use real-world scenario emulation to put design to the test before deployment; for equipment manufacturers, system integrator, and data center operators

Key features

- Emulates DCBX and FCoE and traffic generation to evaluate the functionality, performance, and scalability of a DCB/FCoE switch providing lossless Ethernet transport for FCoE while still servicing native Ethernet traffic
- Supports 2G/4G/8G Fibre Channel integrated with DCB/FCoE in the same test
- Supports Priority Flow Control (PFC) to test DUT's capability to prevent frame loss during congestion
- Emulates Layer 2 Multipath (L2MP) / Equal Cost Multi Path (ECMP) technologies, including IETF TRILL, IEEE SPBM, and Cisco FabricPath
- Supports Virtual Ethernet Port Aggregator (VEPA) and Cisco proprietary VNTAG/VIC emulation
- Includes IxCloudPerf QuickTest to determine the traffic delivery performance of a data center fabric in forwarding a variety of north-south and east-west traffic in cloud computing applications

Testing Converged Data Center Ethernet

Specifications

DCBX/LLDP

Ordering Information

DCBX/FCoE/FC Emulation

930-2039

IxNetwork, Software Option, Fibre Channel over Ethernet (FCoE) Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2043

IxNetwork, Optional Software, DCBX emulation, includes IEEE 802.1AB Link Layer Discovery Protocol emulation of mandatory functions; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2049

IxNetwork, Optional Software, FCF Emulation; REQUIRES purchase of a supported 10GE load module with FCoE option enabled; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2074

IxNetwork, Optional Software, FC N_Port Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2078

IxNetwork, Optional Software, VIC Client Emulation; REQUIRES 930-2043 DCBX Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2099

IxNetwork, Optional Software, FC F_Port Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

L2MP_ECMP Emulation

930-2042

IxNetwork, Software Option, Data Center Ethernet IS-IS (DCE IS-IS) Emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2084

IxNetwork, Optional Software, SPBM (Shortest Path Bridging MAC-in-MAC); REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2093

IxNetwork, Optional Software, IxNetwork, Optional Software, VEPA (Virtual Edge Port Aggregator), IEEE 802.1Qbg EVB (Edge Virtual Bridging); REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2098

IxNetwork, Optional Software, TRILL (Transparent Interconnect of Lots of Links) emulation; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

Bundles

930-2508

IxNetwork Software Bundle, FCoE and FC QuickTest Bundle with FCF Emulation. INCLUDES: IxNetwork DCBX, FCoE, FC N_Port, and FCF Emulations, and IxNetwork Quick Test FCoE Performance Test Suite. REQUIRES: Pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

QuickTest

930-2411

IxNetwork, Optional Software, IxCloudPerf QuickTest, REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)

930-2405

IxNetwork, Optional Software; FCoE/FC Performance QuickTest; This QuickTest performs binary and step search to find the max no-drop and no-PAUSE throughput performance of a DCB switch, an FCoE switch, or an FC switch; REQUIRES 930-2039 IxNetwork FCoE-Client Emulation; REQUIRES 930-2043 IxNetwork DCBX emulation if DCBX is required; REQUIRES 930-2049 IxNetwork FCF emulation if FCF emulation is required; REQUIRES 930-2074 IxNetwork FC N_Port emulation if Fibre Channel is required; REQUIRES pre-existing 930-1999 IxNetwork Base license OR new purchase of either IxNetwork Base PLUS (930-2056) or IxNetwork Base PREMIUM (930-2076)
