

PathWave Advanced Design System (ADS) and PathWave EM Design (EMPro) Platform OS Support Roadmap

Platform support by product release

Keysight PathWave Design Software (formerly Keysight EEs of EDA) reviews operating system (OS) support plans on a regular basis and updates the information as it becomes available. PathWave Design Software generally follows the ESDA OS roadmap available at <http://esd-alliance.org/interoperability-committee/>. Not all product releases are supported on all platforms and/or operating system combinations.
