

Keysight Technologies

Fostering Environmental Sustainability

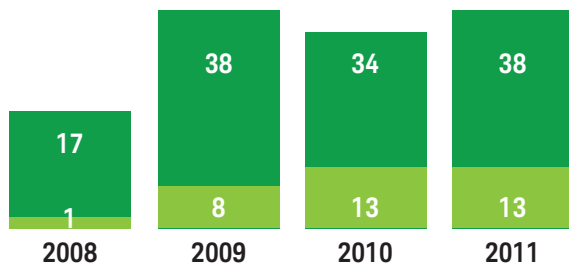

Keysight's commitment to the environment is part of our corporate legacy and embraced by senior management worldwide

- Recognized as one of the "Global 100 Most Sustainable Corporations in the World" for 4th straight year
- 8 consecutive years of reducing worldwide energy consumption, a contribution to reducing greenhouse gases
- U.S. EPA Climate Leader Program Pledge, a commitment to reduce greenhouse gas emissions 10% by 2011
- 1 megawatt on-site solar-power generation installed throughout Keysight facilities
- ISO 14001:2004-registered Keysight Environmental Health & Safety Management System
- Participation in the Carbon Disclosure Project Environmental Survey, providing greenhouse gas emission transparency
- Executive-sponsored programs positioned to remove Pb(lead)-based solder and components from our products
- Recycled and conserved over 35 million gallons of water per year since 2006 at Keysight's Santa Rosa, CA site

Energy saved due to conservation and efficiency improvements

- Energy saved by increase in energy efficiency (GJ)
- Energy saved by generation of onsite solar power (GJ)

Total direct and indirect Greenhouse Gas (GHG) emissions by weight (metric kilotonnes CO₂)

- Indirect GHG emissions
- Direct GHG emissions
- Total GHG emissions
