M9502A and M9505A AXIe Chassis

Product Fact Sheet

Industries and Applications

- Aerospace and defense
- Semiconductor testing
- Communications
- Electronics test

Product Description

The Keysight Technologies, Inc. M9502A and M9505A AXIe chassis are fully compatible with the AXIe 1.0 specification. They provide 2 or 5 slots for AXIe instrument modules, and have an embedded system module that does not take up an instrument slot. The embedded system module provides Gigabit LAN and x8 PCIe® interfaces for connecting the chassis to an external controller. To minimize rack space, the instrument module slots are arranged horizontally. In addition, both the power supply and fan tray can be removed while the chassis remains in the rack for maintenance.

Models	
M9502A	2-slot AXIe chassis
M9505A	5-slot AXIe chassis

Main Features and Benefits

Product features	Your benefit
