PXI Vector Network Analyzer: Drive Down the Size of Test

As the margins for multiport devices become tighter, your test equipment needs to be one step ahead. The M980xA PXie Vector Network Analyzer (VNA) meets the most demanding multiport challenges with exceptional measurement performance and a fast cycle time so you can do more in less time. Gain deeper insights into your devices with the widest available portfolio of measurement applications for PXI VNAs, including spectrum analysis, noise figure measurements, and more.

This configuration guide describes standard configurations, options, accessories, upgrade kits and compatible peripherals for the M980xA Series PXie VNA.

M980xA Series:

- M9800A  9 kHz to 4.5 GHz, 2/4/6-port
- M9801A  9 kHz to 6.5 GHz, 2/4/6-port
- M9802A  9 kHz to 9 GHz, 2/4/6-port
- M9803A  9 kHz to 14 GHz, 2/4/6-port
- M9804A  9 kHz to 20 GHz, 2/4/6-port
- M9805A  100 kHz to 26.5 GHz, 2-port
- M9806A  100 kHz to 32 GHz, 2-port
- M9807A  100 kHz to 44 GHz, 2-port
- M9808A  100 kHz to 53 GHz, 2-port

</tr>
</tbody>
</table>

1. The S95xxxB and S95xxxA offer the same functionalities.
2. The S95xxxB software has six license types, please refer to “Keysight Software Licensing Options Provide Flexibility and Support” for more detail.
3. The S95xxxA software and all associated options will be discontinued, and the last date this product can be ordered is November 30, 2020. Supported software license types: node-locked perpetual (1FP), node-locked 12 month (1FL), transportable perpetual (1TP) and transportable 12 month (1FL). All license options have to be ordered as separate items and installed in a PC or PXI embedded controller.
4. See the S95070B description in “Measurement Application Software” for the supported signal generators.
5. Provides frequency offset mode (FOM) to independently set the frequency of internal source and receivers, and to configure external sources using External Device Configuration.
6. When configuring a multiport VNA using multiple M980xA modules, the Y1730A is recommended for each additional multipport interconnection.
7. A 4-port ECal module (i.e. N4431/32/33) is recommended for multiport measurements (n > 4).
8. Only the 4-port ECal modules (i.e. N4431/32/33) are supported for calibration with S95553B.
## Calibration options

</thead>
</table>
| PS-S40-01     | Included - instrument care and operations starter training       | • Provides startup training service that reduces complexity associated with initial setup and enables users to get to measurements fast.  
• Recommended topics are product overview, system setup and initial measurements.  
• Can be delivered remotely or on-site. |
| PS-S40-02     | Optional - technology and measurement science standard training   | • Provides customized technology and measurement science training. Enable users to get deeper insights into the VNA measurement theory and applications.  
• Recommended topics are VNA theory and applications.  
• Can be delivered on-site or in Keysight office. |
| PS-S40-03     | Optional - premium functional and customer specific application training | • Provides an integrated training experience that fits to the users’ needs on applications or workflow.  
• Custom topics based on the user needs. Discuss the training needs with the Keysight sales representative. |

</tr>
<tr>
<td>M9341B 6</td>
<td>Digital I/O and analog I/O</td>
<td>Includes a 24-bit digital I/O and an 8-bit digital I/O to allow users to control the device under test (DUT) directly with serial or parallel digital signals. The M9341B has four analog input connectors to allow sensing of DC voltages from the DUT. The measured DC voltage can be displayed on the firmware. The M9341B also supports two variable DC source outputs to control the DUT, while the DC source current can be monitored during measurements.</td>
</tr>
</tbody>
</table>

1. PXI switch modules are directly controlled by the M980xA firmware.
2. Can be used as an RF source switch to isolate the M980xA’s source signal during noise figure measurements.
3. Requires M980xA firmware revision A.13.90 or above for the operation.
4. Requires M980xA firmware revision A.14.10 or above for the operation.
5. For more information on the M9379A, see the data sheet, literature number 5992-1795.
6. For more information on the M9341A/B, see the data sheet, literature number 5992-1856EN.
## Additional hardware

</tbody>
</table>
### Chassis and accessories

**Step 1. Select a chassis**

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
<th>Additional information</th>
</tr>
</thead>
<tbody>
<tr>
<td>M9010A</td>
<td>10-slot PXIe chassis</td>
<td></td>
</tr>
<tr>
<td>M9018A</td>
<td>18-slot PXIe chassis Gen 2</td>
<td></td>
</tr>
<tr>
<td>M9018B</td>
<td>18-slot PXIe chassis Gen 2</td>
<td></td>
</tr>
<tr>
<td>M9019A</td>
<td>18-slot PXIe chassis Gen 3</td>
<td></td>
</tr>
</tbody>
</table>

1. Select the right PXI chassis depending on required DC output power.
2. The M9005A PXIe chassis is not supported for the operation with the M980xA Series.
3. The M9018A PXIe chassis supports the operation with maximum six M980xA modules.

**Step 2. Choose enough slot blocker kits and EMC filler panels to fill every open slot.**

**Step 3. Choose a rack mount kit (optional)**

<table>
<thead>
<tr>
<th>Model</th>
<th>Description</th>
<th>Additional information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y1212A</td>
<td>Slot blocker kit: 5 slots</td>
<td></td>
</tr>
<tr>
<td>Y1213A</td>
<td>PXI EMC filler panel kit: 5 slots</td>
<td></td>
</tr>
</tbody>
</table>

1. Non-EMC filler panels are included with the M9018B or M9019A PXIe 18-slot chassis.

1. For more information on the rack mount kit, see the chassis data sheet, literature number 5992-1481EN.
Step 4. Choose an air inlet kit (optional) ¹. Recommended for rack mounted systems with less than 1U space below chassis.

<table>
<thead>
<tr>
<th>Model</th>

</tr>
</thead>
<tbody>
<tr>
<td>Y1214B</td>
<td>Air inlet kit: M9018B or M9019A 18-slot chassis</td>
<td></td>
</tr>
</tbody>
</table>

¹ For more information, please visit [www.keysight.com/find/m9018b](http://www.keysight.com/find/m9018b)

**Select Controller (Either Embedded Controller or via PC)**

**Step 1. Select embedded controller ¹**

M9037A High-performance embedded controller, Gen 3 Intel i7-4700EQ quad-core processor, 2.4 GHz, 8 thread, 4 GB RAM

Select M9037A for the best performance if you have memory intensive applications, multiple applications running in parallel or if a lot of data is sent to the PC from the PXIe chassis. Features removable SSD drive for security and x8 PCIe® connector on front for connection to second chassis.

¹ The M9010A 10-slot chassis or M9018B / M9019A 18-slot chassis includes empty space to the left of the 1st functional slot. The embedded controller occupies that empty space and the 1st functional slot.

**Step 2. Upgrade from standard memory size (optional)**

| M9037A-M08 | Memory upgrade from 4 GB to 8 GB RAM (Win 7, 64-bit only) |
| M9037A-M16 | Memory upgrade from 4 GB to 16 GB RAM (Win 7, 64-bit only) |

**Step 3. Select an operating system**

| M9037A-WE3   | Microsoft Windows Embedded Standard 7 (32-bit) |
| M9037A-WE6   | Microsoft Windows Embedded Standard 7 (64-bit)  |
| M9037A-W16   | Microsoft Windows 10 IoT Enterprise LTSB (64-bit) |

Measurement Application Software
Automatic fixture removal (S95007B/A)

Many devices do not have coaxial connectors and are put in fixtures in order to measure them in a coaxial environment. Accurately removing the effects of the fixture is required to get a good measurement of the device under test (DUT). This application adds a powerful application wizard to guide you through characterizing a fixture and removing it from the measurement. Devices can be single-ended or differential. Files can be saved in a variety of formats for later use in ENA, PNA, PXI VNA, USB VNA, ADS, and PLTS.

Time domain analysis (S95010B/A)

This application enables the analyzer to view reflection and transmission responses in time or distance. Use time domain to tune filters, gate out the response of fixtures and cables, characterize the impedance of transmission lines and more.

Enhanced time domain analysis with TDR (S95011B)

This application enables the analyzer to perform enhanced time domain analysis for high-speed data applications. All functionality of the S95010B/A are included (TDR/TDT mode). In addition, the S95011B enables more detailed measurements and evaluations, such as eye-diagram/mask modes, without adding PLTS software. Jitters and/or emphasis/equalization capabilities enables simulation of real-world signals and environment. The S95011B covers up to 53 GHz bandwidth with 8.42 psec rise time. Full calibration is available and the automatic deskew ensures easy removal of fixture and probe effects. To get the best accuracy, mechanical calibration kits or ECal with DC option (i.e. N443xD or N469xD with Option 0DC) are recommended.

When the M980xA PXI VNA is launched as a multiport VNA using multiple VNA modules with the S95551B/A, the number of test ports can be increased for this application. The S95011B supports maximum 24-port measurements with multiport DUT topologies, such as six differential 2-port DUTs or 24x single-ended 1-port DUTs.

Basic pulsed-RF measurements (S95025B/A)

This application enables internal pulse generators that can be used to control the internal pulse modulators, and it provides an integrated pulse application that uses the wideband-detection method. The software requires hardware option 021 pulse modulator hardware.

The pulse application provides an easy way to set up point-in-pulse measurements with pulse width as narrow as 1 us, and pulse-profile measurements with 40 ns minimum timing resolution. Using the built-in pulse modulators, the M980xA PXIe VNA is a complete pulsed-RF measurement solution, eliminating the need for external test sets and pulse generators. S95025B/A also controls external pulse generators and modulators and can synchronize to external master pulses. The Y1731A PXI Adapter Module is recommended to access pulse signals with SMB connectors if using external master pulses or external pulse modulators.
Noise figure measurements with vector correction (S95029B/A)

This software application enables high-accuracy noise figure and noise-power measurements of amplifiers utilizing Keysight’s unique vector-source-correction technique that uses Keysight N469x series ECal module as a source-impedance tuner to remove the effects of imperfect system-source match. This approach yields accuracy that surpasses that provided by the Y-factor method and other cold-source implementations, especially for in-fixture, on-wafer, and automated-test environments. S95029B/A controls N469x Series ECal modules configured as impedance tuners for use with the M980xA PXIe VNA.

A scalar-calibrated method is also available that offers less accuracy but is faster and does not require an impedance tuner. This method requires an external switch to isolate the M980xA’s source signal during noise figure measurements. A 50-ohm load must be connected to the DUT’s input using the switch.

The instrument’s standard receivers are used for noise figure measurements with the S95029B/A. An external preamplifier, filter(s) and switches are required for devices with < 30 dB of excess noise (gain plus noise figure in dB)\(^1\). A typical block diagram of vector-calibrated noise figure measurements is shown.

For calibration, a standard mechanical cal kit or ECal module is required for the S-parameter portion of the cal (an ECal used as a tuner cannot be shared for calibration). To calibrate a standard receiver for noise figure measurements, a power meter/sensor is required. A 346-series noise source (Keysight 346C or 346C-K01 recommended) can be used for noise calibration of the instrument’s receiver, when a preamplifier is located before the receiver. All calibration accessories and external hardware must be ordered separately.

Noise figure measurements with the M980xA are verified between 50 MHz and 45 GHz. Noise figure measurements of frequency converting devices are not supported with the S95029B/A.

---

\(^1\) The M9379A RF Amplifier Module includes internal amplifiers and switches, enabling synchronized fast tests for both S-parameters and noise figure measurements up to 13.5 GHz with the PXI system. See the data sheet, literature number 5992-1795 for more detail.
**Modulation distortion (S95070B)**

This application software with the M980xA’s direct receiver access (DRA) configurations and a vector signal generator measures the in-channel and out-of-channel nonlinear behavior of power amplifiers under modulated stimulus conditions. It employs a new frequency-domain measurement method that quickly measures EVM or ACPR and performs VNA calibration to make accurate measurements.

The software provides a full integrated measurement setup including the modulation signal generation and allows the user to easily configure and make the measurements.

The S95070B requires option 090 spectrum analysis hardware of the M980xA.

The signal generators supported by this application are:
- M9383/84B VXG Microwave Signal Generator, 1 MHz to 44 GHz
- M9410A/11A/20A/21A VXT PXIe Vector Transceiver
- N5182B MXG X-Series RF Vector Signal Generator, 9 kHz to 6 GHz
- N5192A/94A UXG X-Series Vector Adapter Modified Version, 50 MHz to 20 GHz, with U3039ACK 6 GHz Reference Source
- M9383A PXIe Microwave Signal Generator, 1 MHz to 44 GHz

**Scalar mixer/converter measurements (S95082B/A)**

The S95082B/A provides frequency offset mode (FOM) to set the frequency of the VNA’s internal source independently from where the receivers are tuned, and to configure external sources using External Device Configuration. This functionality is also included with S95029/070/083/084/086/089/090, both B and A models.

With a simple setup and calibration, this application delivers the highest accuracy for scalar conversion-loss/gain measurements by combining one-port and power-meter calibrations to remove mismatch errors. S95082B/A provides an intuitive and easy-to-use user interface for setting up mixer and converter measurements, with single or dual conversion stages. It can control external signal generators for use as LO signals. Supported external sources include the Keysight ESG, PSG, EXG, and MXG Series, as well as other SCPI-controlled signal generators.

S95082B/A is compatible with S95084B/A, which enables measurements of converters with internal LOs.

**Vector and scalar mixer/converter measurements (S95083B/A)**

This application includes the scalar mixer/converter plus phase (SMC+Phase) measurement class that provides fully calibrated conversion gain/loss, relative phase, and absolute group delay measurements of mixers and converters without the need for reference or calibration mixers. Eliminating the calibration mixer requires a U9391C/F/G comb generator and an external DC power supply capable of sourcing +15 V and 300 mA for U9391C/F or 800 mA for U9391G. A macro-based series-reference-mixer version of VMC is also included for measuring the phase difference between multiple paths or devices, or for measuring phase shifts within the frequency-converting device. The macro also supports characterization of the calibration mixer that is supplied by the user.
SMC+Phase with the S95083B/A provides an intuitive and easy-to-use user interface for setting up mixer and converter measurements, with single or dual conversion stages. It can control the analyzer’s built-in source as well as external signal generators for use as LO signals. Supported external sources include the Keysight ESG, PSG, EXG, and MXG Series, as well as other SCPI-controlled signal generators. S95083B/A is a superset of S95082B/A, so they should not be installed together.

S95083B/A is compatible with S95084B/A, which enables measurements of converters with internal LOs.

1. When a comb generator is used as a phase reference for calibration and the start frequency of the measurement is less than 630 MHz, a user-supplied calibration mixer is required.

**Embedded LO capability (S95084B/A)**

This application tunes the analyzer’s receivers to the output frequency of the converter under test without the need for access to internal LOs or a common reference signal. S95084B/A is intended to work with S95082B/A and S95083B/A measurement applications.

**Gain compression measurements (S95086B/A)**

The gain compression application (GCA) provides input power, output power, gain, and phase at the compression point of an amplifier over a specified frequency range. GCA’s SMART Sweep is very fast and easy-to-use. GCA also includes a guided calibration that corrects for absolute power levels, frequency response, and mismatch errors.

Gain compression measurements of frequency converting devices are not supported with the S95086B/A.

**Differential and I/Q device measurements (S95089B)**

This application combines source-phase control of multiple internal or external sources with frequency-offset mode, enabling simplified test of I/Q modulators/converters and differential mixers, and harmonic measurements of differential amplifiers. The phase difference between sources can be fixed (for example, at 90 or 180 degrees), or swept between two specified phase values. Providing accurate control of the relative phase between sources eliminates the need for hybrid couplers and baluns to create quadrature or differential signals. After achieving the desired phase alignment, the instrument’s receivers can be tuned to all frequencies needed to characterize the DUT. On an I/Q modulator for example, measurements can be made of both the desired and suppressed conversion bands, along with LO leakage, harmonics and other spurious signals. Phase sweeps can be used to determine a DUT’s phase imbalance versus frequency. Users can specify measurements with individual receivers or multiple receivers combined with a wide range of mathematical operators. Power measurements can employ match correction for increased accuracy. S95089B only works on a multiport VNA using multiple M980xA modules with S95551B/A.
Spectrum analysis (S95090B/A)

The spectrum analyzer (SA) application adds high-performance microwave spectrum analysis to the M980xA. With fast stepped-FFT sweeps resulting from optimized data processing, the SA application provides quick spurious searches over broad frequency ranges. Simultaneous spectrum measurements can be done using test and reference receivers. This multi-channel SA can be used with the internal swept-signal generators for efficient measurements of spurious signals emanating from mixers and frequency converters. The SA application employs source-power and receiver-response calibration as well as fixture de-embedding, providing in-fixture and on-wafer spectrum measurements with the highest level of accuracy. Accurate and fast noise power ratio (NPR) measurement capability is also included in this software application. It provides the ability of setting up and controlling of external signal generator/arbrrary waveform generators and performing the calibration of the flatness of a wideband signal and distortion signals in notches, and achieving very fast NPR measurements. Optional external attenuators should be connected with the VNA’s test ports to avoid receiver compression when measuring large signals.

The S95090B/A software requires option 090 spectrum analysis hardware.

Multiple instruments/modules measurements (S95551B/A)

Keysight M980xA PXIe VNA offers a capability to extend the number of ports for your measurements by using multiple PXI modules. With the S95551B/A, multiple PXI modules may be installed in one or two PXI chassis and identified by the M980xA firmware as one VNA under a single controller. Operations with a single PXI module with 2-, 4- or 6-ports do not require the S95551B/A for full calibrated measurements.

The S95551B/A extends the number of internal sources up to two by using multiple M980xA modules. An additional signal (fixed or swept) is used as a local oscillator for testing mixers and frequency converters, or two-tone intermodulation testing of amplifiers using SA measurement class. To independently control the frequency of the two internal sources, one of the following software applications is required: S95029/070/082/083/084/086/089/090, both B and A models.

The frequency of the multiport array is determined by the lowest frequency instrument configured in the array. For example, a 4-port analyzer configuration using a M9800A (4.5 GHz) and a M9804A (20 GHz) would have a maximum frequency of 4.5 GHz when performing 4-port measurements. This behavior extends to other measurement application software (S95xxxB/A).

Each M980xA module is connected into the array with Keysight cables. A Y1730A Interconnect Cables for Multiport Configuration should be ordered for each additional module and a single Y1281A accessory and tool kit should be ordered for easier cable connections.

Multiport calibration assistant (S95552B)

This application software provides a tool to flexibly create and manage cal sets for multiport measurements. For example, two cal sets with independent test ports can be combined as one cal set with a greater number of test ports. The software also offers a way to re-calibrate using a certain set of test ports to refresh the cal set.

At least one ECal module is required for the operation of S95552B.
Multiport calibrated measurements with switch instruments (S95553B)

This application provides a macro which enables full multiport error correction and measurement capabilities using external switch instruments such as the M9164A/B or M9165A/B PXIe Solid-state Switch Matrix. The software delivers an easy-to-use measurement wizard that simplifies measurement procedures and reduces the setup time of complicated multiport measurements. Measured multiport S-parameters are displayed in the VNA viewer.

The 66-port multiport configuration using a 10-port M980xA (with 6-port and 4-port M980xAs) and four 2x16 PXIe switch matrices has been evaluated.

Only the 4-port ECal modules (i.e. N4431/32/33D) are supported for multiport calibration with the S95553B.

Material measurements

The Keysight N1500A materials measurement suite streamlines the process of measuring complex permittivity and permeability with a vector network analyzer. Various type of measurements, such as transmission line and free space, arch reflectivity, resonant cavity, and coaxial probe are available as options. The easy-to-use software guides the user through setup and measurement, instantly converting S-parameter network analyzer data into the data format of your choice and displaying the results within seconds. Results can be charted in a variety of formats: $\varepsilon_r'$, $\varepsilon_r''$, tand, $\mu_r'$, $\mu_r''$, tand$\mu$, and Cole-Cole.

N1930B Physical Layer Test System (PLTS) software

The PLTS software platform has become an industry standard for calibration, measurement, and analysis of linear passive interconnects such as cables, connectors, backplanes, and printed circuit boards. Utilizing either a vector network analyzer (VNA) or a time domain reflectometer (TDR), fast and accurate measurements can be obtained without in-depth knowledge of microwave measurement techniques. Refer to www.keysight.com/find/plts or the technical overview (literature number 5989-6841EN) for more details.

Automatic Measurement Expert (AMX)

This software package is a smart software solution for automated multiport S-parameter measurements with the M980xA. The S94701A AMX test plan builder provides an interactive GUI which helps you edit your multiport DUT test plans and generate test sequence files for the network analyzers. The S94702A and KS8400A software running on the analyzer executes the test sequences according to the optimized test sequence files generated by the S94701A.
Upgrading your System

Upgrade kits are available to add options after initial purchase. To upgrade the M980xA PXIe VNAs, order the corresponding item number. To add application software, order the appropriate standalone mode numbers (S95xxxB/A).

A complete list of M980xA upgrade kits is available on our Web site:

www.keysight.com/find/m980xa-upgrades
Multi-site Measurement Configurations

M980xA multi-site capability allows each PXI module to behave as an independent VNA and perform simultaneous measurements to increase overall throughput. Each PXI VNA module or multiport array of modules is installed and identified under a single PXI controller. This makes it possible to run measurements of different devices at the same time or different measurement paths in a single component.

Multiple instances of the M980xA software are launched and each software instance is connected to either an individual M980xA, or a multiport array. Each instance behaves as an independent instrument to be used simultaneously, resulting in a significantly lower cost-of-test per device with improved throughput.

Examples of multi-site measurement configurations

To enable additional features of S95xxxB software in a multi-site configuration, one floating license (ex. R-A5E-002-B) must be installed in a PXI controller for each additional VNA instance. This behavior applies to all S95xxxB software models. If features with S95xxxB software are not required for multi-site measurements, an additional software license is not needed.
Direct Receiver Access (DRA) Configurations

The M980xA supports direct receiver access (DRA) configurations to flexibly set up test systems with optimized performance by integrating with external components such as booster amplifiers, attenuators, or directional couplers. This function (included in the VNA firmware) combines three physical test ports of the M980xA(s) and defines as a single logical port. You can perform measurements including calibration and post processing using the logical ports.

DRA configuration with high-power

One example using the DRA configuration is S-parameter measurements with high power. When you need an input level higher than the analyzer’s source can provide, pre-amplifiers are necessary to boost the power level prior to the DUT. However, the reference signal is measured before the booster amplifier with a standard configuration of a 2-port VNA, and temperature drift or high reverse isolation of a booster amplifier will prevent accurate reflection measurements of DUT’s input.

A typical configuration for high-power measurements with the M980xA is shown. A 6-port M980xA (with option 600, up to 20 GHz), or a 6-port VNA with multiple M980xAs are needed to set up the DRA configuration on both port 1 and port 2 of DUT. Reflected and transmitted signals of DUT are detected with all the logical receivers, and the VNA firmware provides measured high-power S-parameters.

External components should be selected based on their high-power limits or frequency range specifications. Be sure that these components can handle the output power level of the booster amplifier.

---

1. External components are not included in the M980xA. Must be purchased separately.
2. The S95551B/A software is required to configure a multiport VNA with multiple M980xA VNA modules.
DRA configuration with modulated source

A 6-port M980xA and an external modulated source is combined with this configuration to support both vector network analysis and modulation distortion analysis with a single connection. The S95070B Modulation Distortion Analysis and M980xA’s option 090 (spectrum analysis hardware) are necessary to measure the nonlinear behavior of DUTs under the wideband modulated stimulus conditions. The VNA-based vector correction extends the reference planes of the signal source to the DUT’s planes. As a result, you can achieve an excellent signal fidelity for accurate and repeatable modulated distortion measurements such as EVM or ACPR.

For measurements at mmWave frequencies more than 26.5 GHz, the M981xAS PXIe Vector Component Analyzer (VCA) is recommended. Refer to M981xAS configuration guide (3120-1344EN) for more details.

A combiner (ex. 11636B or 11636C) and optional attenuator are not included in the M980xA. Must be purchased separately.
Keysight Software Licensing Options Provide Flexibility and Support

Projects ramp up and down, teams grow and shrink, and projects move location. In such a dynamic environment, you need flexible licensing options that allow you to balance your project’s requirements. Whether your software will be a staple for years to come or you have a short-term need for a leading-edge measurement application, Keysight’s licensing puts you in charge.

Choose your term. Choose your type. Keep control of your budget.

- Select a node-locked, transportable, USB portable or floating license type, depending on how much flexibility you need.
- Select a time-based or perpetual license term, depending on how long you need to use the software.
- Each license is sold with a KeysightCare software support subscription which provides technical support with ensured response time, proactive software updates, enhancements and fixes.

Choose a license term and type that best suits your requirements from the table below.

### License term

<table>
<thead>
<tr>
<th>License term</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Perpetual</td>
<td>Perpetual licenses can be used indefinitely.</td>
</tr>
<tr>
<td>Time-based</td>
<td>Time-based licenses can be used through the term of the license (6, 12, 24, or 36 month)</td>
</tr>
</tbody>
</table>

### License type

<table>
<thead>
<tr>
<th>License type</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Node locked</td>
<td>License can be used on one specified instrument/computer.</td>
</tr>
<tr>
<td>Transportable</td>
<td>License can be used on one instrument/computer at a time but may be transferred to another using Keysight Software Manager (internet connection required).</td>
</tr>
<tr>
<td>USB portable</td>
<td>License can be used on one instrument/computer at a time but can be transferred to another using a certified USB dongle (available for additional purchase, Keysight part number E8900-D10).</td>
</tr>
</tbody>
</table>
| Floating     | Networked instruments/computers can access a license from a server one at a time. Multiple licenses may be purchased for concurrent usage. Three types of floating license are available:
  Single Site: 1-mile radius from the server  
  Single Region¹: Americas, Europe, Asia  
  Worldwide (export restriction identified in End User License Agreement (EULA)) |

¹. Americas (North, Central, and South America, Canada); Europe (European Continent, Middle Eastern Europe, Africa, India); Asia (North and South Asia Pacific Countries, China, Taiwan, Japan).
KeysightCare Software Support Subscription provides peace of mind amid evolving technologies.

- Ensure your software is always current with the latest enhancements and measurement standards.
- Gain additional insight into your measurement problems with live access to our team of technical experts.
- Stay on schedule with fast turnaround times and priority escalations when you need support.

<table>

1. USB portable license requires a certified USB dongle (available for additional purchase, Keysight part number E8900-D10).
2. For S95xxxB software, the fixed-perpetual with a 12-months, support subscription (R-A6E-001-L) is the only license type that can be ordered as part of the instrument and installed. The other license types for S95xxxB software must be ordered separately and installed from the web after the receipt of the instrument.
Measurement Accessories

A complete list of RF and microwave test accessories is available on our Web site: www.keysight.com/find/mta

Accessories are available in these connector types: 50 Ω Type-N, 3.5 mm, 7 mm, 2.4 mm, 2.92 mm, 1.85 mm, and waveguide. Test port cables and a calibration kit should be added for a complete measurement system. A verification kit is used to verify corrected system performance.

Cable and adapter sets

Keysight offers cables in the following types:

- Single cables in semi-rigid and flexible
- Cable sets in semi-rigid and flexible

There are also adapter sets available that protect the test port and convert the port to the desired connector interface. These kits contain:

- One male adapter
- One female adapter

To attain the best mechanical rigidity for device connection, use a single cable and the appropriate special adapter set. To attain the greatest flexibility for device connection, use a cable set.
**Calibration kits**

**Coaxial measurements**

Mechanical calibration kits include standards, such as opens, shorts and loads, which are measured by the network analyzer for increased measurement accuracy.

Choose a calibration kit for each connector type to be used.

**Economy**, includes:
- Open standards (male and female)
- Short standards (male and female)
- Fixed-termination standards (male and female)

**Standard**, includes the devices in the economy kit and adds:
- Sliding load standards (male and female) or a series of offset shorts

**Precision**, includes the devices in the economy kit and adds:
- 50 Ω airline(s) for TRL calibration
- TRL adapters

Electronic calibration (ECal) kits replace mechanical calibration standards with one solid-state calibration module that is controlled by the network analyzer via USB, to present many different impedances to the test ports. A full two-port calibration can be performed quickly with a single connection. This technique reduces operator errors and connector wear and abrasion.

For more information about ECal modules, refer to the technical overview 5963-3743E (N4690, 85090, N4430 and N7550 Series).

**Waveguide measurements**

For waveguide measurements, Keysight offers mechanical calibration kits that include:
- Waveguide-to-coax adapters (X, P, K, R, Q, U, V)
- Precision waveguide section
- Flush short circuit
- Fixed terminations
- Straight section
For devices with 1.85 mm connectors

Mechanical calibration kits

85058B standard: DC to 67 GHz. Includes:

- 85058-60101 1.85 mm (m) short 5.4 mm
- 85058-60102 1.85 mm (m) short 6.3 mm
- 85058-60103 1.85 mm (m) short 7.12 mm
- 85058-60104 1.85 mm (m) short 7.6 mm
- 85058-60105 1.85 mm (f) short 5.4 mm
- 85058-60106 1.85 mm (f) short 6.3 mm
- 85058-60107 1.85 mm (f) short 7.12 mm
- 85058-60108 1.85 mm (f) short 7.6 mm
- 85058-60109 1.85 mm male open
- 85058-60110 1.85 mm female open
- 85058-60111 1.85 mm male load
- 85058-60112 1.85 mm female load
- 85058-60113 1.85 mm (m) to 1.85 mm (m) adapter
- 85058-60114 1.85 mm (f) to 1.85 mm (f) adapter
- 85058-60115 1.85 mm (m) to 1.85 mm (f) adapter

85058E economy: DC to 67 GHz. Includes:

- 85058-60101 1.85 mm (m) short 5.4 mm
- 85058-60105 1.85 mm (f) short 5.4 mm
- 85058-60109 1.85 mm male open
- 85058-60110 1.85 mm female open
- 85058-60123 1.85 mm male load
- 85058-60124 1.85 mm female load
- 85058-60113 1.85 mm (m) to 1.85 mm (m) adapter
- 85058-60114 1.85 mm (f) to 1.85 mm (f) adapter
- 85058-60115 1.85 mm (m) to 1.85 mm (f) adapter
85058B standard: DC to 67 GHz. Includes:

- Option F0F: Both connectors are 1.85 mm female on module
- Option M0F: 1 female and 1 male 1.85 mm connector on module
- Option M0M: Both connectors are 1.85 mm male on module
- Option 0DC: DC to 67 GHz
- Option 100: 10 MHz to 67 GHz
- Option 00A adds:
  - 85058-60113 1.85 mm (m) to 1.85 mm (m) adapter
  - 85058-60114 1.85 mm (f) to 1.85 mm (f) adapter

Electronic calibration kits

N4694D Microwave ECal: DC or 10 MHz to 67 GHz, 2-ports. Includes:

- Option F0F: Both connectors are 1.85 mm female on module
- Option M0F: 1 female and 1 male 1.85 mm connector on module
- Option M0M: Both connectors are 1.85 mm male on module
- Option 0DC: DC to 67 GHz
- Option 100: 10 MHz to 67 GHz
- Option 00A adds:
  - 85058-60113 1.85 mm (m) to 1.85 mm (m) adapter
  - 85058-60114 1.85 mm (f) to 1.85 mm (f) adapter

For devices with 2.4 mm connectors

Mechanical calibration kits

85056A standard: DC to 50 GHz. Includes:

- 00901-60003 2.4 mm (m) fixed broadband load
- 00902-60004 2.4 mm (f) fixed broadband load
- 00915-60003 2.4 mm (m) sliding load
- 00915-60004 2.4 mm (f) sliding load
- 85056-60005 2.4 mm (m) to 2.4 mm (m) adapter
- 85056-60006 2.4 mm (f) to 2.4 mm (f) adapter
- 85056-60007 2.4 mm (m) to 2.4 mm (f) adapter
- 85056-60020 2.4 mm (m) short
- 85056-60021 2.4 mm (f) short
- 85056-60022 2.4 mm (m) open
- 85056-60023 2.4 mm (f) open
85056D economy: DC to 50 GHz. Includes:

- 00901-60003 2.4 mm (m) fixed broadband load
- 00902-60004 2.4 mm (f) fixed broadband load
- 85056-60005 2.4 mm (m) to 2.4 mm (m) adapter
- 85056-60006 2.4 mm (f) to 2.4 mm (f) adapter
- 85056-60007 2.4 mm (m) to 2.4 mm (f) adapter
- 85056-60020 2.4 mm (m) short
- 85056-60021 2.4 mm (f) short
- 85056-60022 2.4 mm (m) open
- 85056-60023 2.4 mm (f) open

Electronic calibration kits

N4693D Microwave ECal: DC or 10 MHz to 50 GHz, 2-ports. Includes:

- Option FOF: Both connectors are 2.4 mm female on module
- Option M0F: 1 female and 1 male 2.4 mm connector on module
- Option M0M: Both connectors are 2.4 mm male on module
- Option 0DC: DC to 50 GHz
- Option 100: 10 MHz to 50 GHz
- Option 00A adds:
  - 85056-60005 2.4 mm (m) to 2.4 mm (m) adapter
  - 85058-60006 2.4 mm (f) to 2.4 mm (f) adapter

For devices with 2.4 mm connectors

Electronic calibration kits

N4692D Microwave ECal: DC or 10 MHz to 40 GHz, 2-ports. Includes:

- Option FOF: Both connectors are 2.92 mm female on module
- Option M0F: 1 female and 1 male 2.92 mm connector on module
- Option M0M: Both connectors are 2.92 mm male on module
- Option 0DC: DC to 40 GHz
- Option 100: 10 MHz to 40 GHz
- Option 00A adds:
  - N4692-60021 2.92 mm (m) to 2.92 mm (m) adapter
  - N4692-60022 2.92 mm (f) to 2.92 mm (f) adapter
Adapters

- 11904A 2.4 mm (m) to 2.92 mm (m)
- 11904B 2.4 mm (f) to 2.92 mm (f)
- 11904C 2.4 mm (m) to 2.92 mm (f)
- 11904D 2.4 mm (f) to 2.92 mm (m)
- 11904S 2.4 mm to 2.92 mm: Adapter set, contains 4 matched adapters

For devices with 3.5 mm or SMA connectors

Mechanical calibration kits

85033E economy: DC to 9 GHz. Includes:

- 85033-60016 3.5 mm (m) load
- 85033-60017 3.5 mm (f) load
- 85033-60018 3.5 mm (m) open
- 85033-60019 3.5 mm (f) open
- 85033-60020 3.5 mm (m) short
- 85033-60021 3.5 mm (f) short
- 8710-1761 torque wrench

Option 85033E-100 adds:

- 85027-60005 3.5 mm (f) to 3.5 mm (f) adapter

Option 85033E-200 adds:

- 85027-60007 3.5 mm (m) to 3.5 mm (m) adapter

Option 85033E-300 adds:

- 85027-60006 3.5 mm (m) to 3.5 mm (f) adapter

Option 85033E-400 adds:

- 1250-1744 3.5 mm (f) to 50 Ω Type-N (m) adapter
- 1250-1743 3.5 mm (m) to 50 Ω Type-N (m) adapter
- 1250-1745 3.5 mm (f) to 50 Ω Type-N (f) adapter
- 1250-1750 3.5 mm (m) to 50 Ω Type-N (f) adapter

Option 85033E-500 adds:

- 1250-1746 3.5 mm (m) to 7 mm adapter (two included)
- 1250-1747 3.5 mm (f) to 7 mm adapter (two included)
85052B standard: DC to 26.5 GHz. Includes:

- 00902-60003 3.5 mm (m) fixed load
- 00902-60004 3.5 mm (f) fixed load
- 00911-60019 3.5 mm (m) sliding load
- 00911-60020 3.5 mm (f) sliding load
- 85052-60006 3.5 mm (m) short
- 85052-60007 3.5 mm (f) short
- 85052-60008 3.5 mm (m) open
- 85052-60009 3.5 mm (f) open
- 85052-60012 3.5 mm (f) to 3.5 mm (f) adapter
- 85052-60013 3.5 mm (f) to 3.5 mm (m) adapter
- 85052-60014 3.5 mm (m) to 3.5 mm (m) adapter

85052C precision TRL: DC to 26.5 GHz. Includes:

- 00902-60003 3.5 mm (m) fixed load
- 00902-60004 3.5 mm (f) fixed load
- 85052-60006 3.5 mm (m) short
- 85052-60007 3.5 mm (f) short
- 85052-60008 3.5 mm (m) open
- 85052-60009 3.5 mm (f) open
- 85052-60032 3.5 mm (f) to 3.5 mm (f) adapter
- 85052-60033 3.5 mm (m) to 3.5 mm (m) adapter
- 85052-60034 3.5 mm (f) to 3.5 mm (m) adapter
- 85052-60035 3.5 mm short TRL line
- 85052-60036 3.5 mm long TRL line

85052D economy: DC to 26.5 GHz. Includes:

- 00902-60003 3.5 mm (m) fixed load
- 00902-60004 3.5 mm (f) fixed load
- 85052-60006 3.5 mm (m) short
- 85052-60007 3.5 mm (f) short
- 85052-60008 3.5 mm (m) open
- 85052-60009 3.5 mm (f) open
- 85052-60012 3.5 mm (f) to 3.5 mm (f) adapter
- 85052-60013 3.5 mm (f) to 3.5 mm (m) adapter
- 85052-60014 3.5 mm (m) to 3.5 mm (m) adapter
Electronic calibration (ECal) modules

85093C RF ECal: 300 kHz to 9 GHz, 2-ports. Standard module includes:
- Option 00F: Both 3.5 mm connectors are female
- Option 00M: Both 3.5 mm connectors are male
- Option M0F: One female and one male connector, both 3.5 mm
- Option 00A adds:
  - 85052-60012 3.5 mm (f) to 3.5 mm (f) adapter
  - 85052-60014 3.5 mm (m) to 3.5 mm (m) adapter
- Option 150: Replaces standard storage container with a wooden box

- Option 150: Replaces standard storage container with a wooden box

N4433D ECal: DC or 300 kHz to 26.5 GHz, 4-ports

Frequency options

- Option 0DC: DC to 26.5 GHz
- Option 003: 300 kHz to 26.5 GHz

Connector option

- Option 010: 3.5 mm female connector on four ports on module
N4691D Microwave ECal, DC or 300 kHz to 26.5 GHz, 2-ports. Includes:

- Option F0F: Both 3.5 mm connectors are female
- Option M0F: One female and one male connector, both 3.5 mm
- Option M0M: Both 3.5 mm connectors are male
- Option 0DC: DC to 26.5 GHz
- Option 003: 300 kHz to 26.5 GHz
- Option 00A adds:
  - 85052-60012 3.5 mm (f) to 3.5 mm (f) adapter
  - 85052-60014 3.5 mm (m) to 3.5 mm (m) adapter

N755XA Series Economy ECal, 2-ports:

- N7550A DC to 4 GHz, 2-ports
- N7551A DC to 6.5 GHz, 2-ports
- N7552A DC to 9 GHz, 2-ports
- N7553A DC to 14 GHz, 2-ports
- N7554A DC to 18 GHz, 2-ports
- N7555A DC to 26.5 GHz, 2-ports

N755xA Series includes:

- Option 3FF: Both 3.5 mm connectors are female
- Option 3MF: One female and one male connector, both 3.5 mm
- Option 3MM: Both 3.5 mm connectors are male
- Option 150: Plastic storage box
- N7550X-151: 3.5 mm or 2.92 mm torque wrench

**For devices with Type-N connectors**

**Mechanical calibration kits**

85032F standard, DC to 9 GHz Includes:

- 85032-60017 Type-N (m) fixed load
- 85032-60018 Type-N (f) fixed load
- 85032-60013 Type-N (m) open
- 85032-60014 Type-N (f) open
- 85032-60016 Type-N (m) short
- 85032-60015 Type-N (f) short

Option 85032F-100 adds:

- 85032-60021 Type-N (f) to Type-N (f) adapter
Option 85032F-200 adds:
- 85032-60019 Type-N (m) to Type-N (m) adapter

Option 85032F-300 adds:
- 85032-60020 Type-N (m) to Type-N (f) adapter

Option 85032F-500 adds:
- 85054-60001 Type-N (f) to 7 mm adapter (two included)
- 85054-60009 Type-N (m) to 7 mm adapter (two included)

85054B standard: DC to 18 GHz. Includes:
- 00909-60011 Type-N (m) fixed low band load
- 00909-60012 Type-N (f) fixed low band load
- 85054-60025 Type-N (m) short
- 85054-60026 Type-N (f) short
- 85054-60027 Type-N (m) open
- 85054-60028 Type-N (f) open
- 85054-60031 Type-N (f) to 7mm adapter
- 85054-60032 Type-N (m) to 7mm adapter
- 85054-60037 Type-N (f) to Type-N (f) adapter
- 85054-60038 Type-N (m) to Type-N (m) adapter
- 85054-80010 Type-N (f) sliding load
- 85054-80009 Type-N (m) sliding load
- 85054-60050 Type-N (f) connector gage
- 85054-60052 Type-N (f) gage master
- 85054-60051 Type-N (m) connector gage
- 85054-60053 Type-N (m) gage master

85054D economy: DC to 18 GHz. Includes:
- 85054-60025 Type-N (m) short
- 85054-60026 Type-N (f) short
- 85054-60027 Type-N (m) open
- 85054-60028 Type-N (f) open
- 85054-60031 Type-N (f) to 7mm adapter
- 85054-60032 Type-N (m) to 7mm adapter
- 85054-60037 Type-N (f) to Type-N (f) adapter
- 85054-60038 Type-N (m) to Type-N (m) adapter
- 85054-60046 Type-N (m) fixed load
- 85054-60047 Type-N (f) fixed load
Electronic calibration (ECal) modules

85092C RF ECal: 300 kHz to 9 GHz, 2 ports. Includes:

- Option 00F: both Type-N connectors are female
- Option 00M: both Type-N connectors are male
- Option M0F: one female and one male connector, both Type-N
- Option 00A adds:
  - 85054-60037 Type-N (f) to Type-N (f) adapter
  - 85054-60038 Type-N (m) to Type-N (m) adapter

- 1250-1475 Type-N (m) to Type-N (m) adapter (two included)
- 11511A Type-N (f) short
- 11512A Type-N (m) short

11878A Type-N to 3.5 mm adapter kit. Includes:

- 1250-1744 3.5 mm (f) to 50 Ω Type-N (m) adapter
- 1250-1743 3.5 mm (m) to 50 Ω Type-N (m) adapter
- 1250-1745 3.5 mm (f) to 50 Ω Type-N (f) adapter
- -1250-1750 3.5 mm (m) to 50 Ω Type-N (f) adapter

11524A 7 mm to Type-N (f) adapter

11525A 7 mm to Type-N (m) adapter

For devices with 7 mm connectors

Mechanical calibration kits

85050B standard: DC to 18 GHz. Includes:

- 00909-60008 7 mm coax termination
- 85050-60006 7 mm fixed broadband load
- 85050-80007 7 mm short
- 85050-80010 7 mm open
- 85050-80011 7 mm sliding load

85050C precision TRL: DC to 18 GHz. Includes:

- 00909-60008 7 mm coax termination
- 85050-60003 7 mm to 7 mm airline
- 85050-60005 7 mm to 7 mm TRL adapter
- 85050-60006 7 mm fixed broadband load
- 85050-80008 7 mm short
- 85050-80009 7 mm short with collect
- 85050-80010 7 mm open

85050D economy: DC to 18 GHz. Includes:

- 85050-60006 7 mm fixed broadband load
- 85050-80007 7 mm short
- 85050-80010 7 mm open
Electronic calibration (ECal) modules

N4696D Microwave ECal: DC or 300 kHz to 18 GHz, 2-ports, 7 mm connectors. Includes:

- Option 0DC: DC to 18 GHz
- Option 003: 300 kHz to 18 GHz

For devices with waveguide

Mechanical calibration kits

X-Band

X11644A standard, WR-90: 8.2 to 12.4 GHz. Includes:

- 00896-60008 X-band standard section
- 00910-60003 X-band termination
- 11644-20018 X-band short
- 11644-20021 X-band shim
- X281C adapter (included in calibration kit): WR-90 to 7 mm

P Band

P11644A standard, WR-62: 12.4 to 18 GHz. Includes:

- 00896-60007 P-band standard section
- 00910-60002 P-band termination
- 11644-20017 P-band short
- 11644-20020 P-band shim
- P281C adapter (included in calibration kit): WR-62 to 7 mm

K Band

K11644A standard, WR-42: 18 to 26.5 GHz. Includes:

- 00896-60006 K-band standard section
- 00910-60001 K-band termination
- 11644-20016 K-band short
- 11644-20019 K-band shim
- K281C adapter (included in calibration kit): WR-42 to 3.5 mm (f) Option 012 WR-42 to 3.5 mm (m)
R Band

R11644A standard, WR-28: 26.5 to 40 GHz. Includes:
• 00914-20028 R-band termination
• 11644-20005 R-band short
• 11644-20003 R-band shim
• 11644-60001 R-band 10 cm straight waveguide
• 11644-60016 R-band 5 cm straight waveguide

Q Band

Q11644A standard, WR-22: 33 to 50 GHz. Includes:
• 11644-60005 Q-band termination
• 11644-20004 Q-band short
• 11644-20001 Q-band shim
• 11644-60002 Q-band 10 cm straight waveguide
• 11644-60017 Q-band 5 cm straight waveguide

U Band

U11644A standard, WR-19: 40 to 60 GHz. Includes:
• 11644-60006 U-band termination
• 11644-20004 U-band short
• 11644-20002 U-band shim
• 11644-60003 U-band 10 cm straight waveguide
• 11644-60018 U-band 5 cm straight waveguide

Verification kits

All Keysight verification kits include:
• Precision Z0 airline or match thru
• Mismatched airline or mismatch thru
• Fixed attenuators (except 85059V)
• Traceable measured data and uncertainties
85051B 45 MHz to 18 GHz 7 mm kit
Includes attenuators, airline and mismatch airline with data on a USB drive for use in confirming calibrated system performance, traceable to national standards. Test procedure is provided in the service manual.

85053B 300 kHz to 26.5 GHz 3.5 mm kit
Includes attenuators, airline and mismatch airline with data on a USB drive for use in confirming calibrated system performance, traceable to national standards. Test procedure is provided in the service manual.

85055A 300 kHz to 18 GHz Type-N kit
Includes attenuators, airline and mismatch airline with data on a USB drive for use in confirming calibrated system performance, traceable to national standards. Test procedure is provided in the service manual.

85057B 45 MHz to 50 GHz 2.4 mm kit
Includes attenuators, airline and mismatch airline with data on a USB drive for use in confirming calibrated system performance, traceable to national standards. Test procedure is provided in the service manual.

85058V 45 MHz to 67 GHz 1.85 mm kit
Includes attenuators, match thru and mismatch thru with data on a USB drive for use in confirming calibrated system performance, traceable to national standards. Test procedure is provided in the service manual.
Accessories

CalPod calibration refresh modules (8553xB/4xB)

CalPod calibration refresh modules allow in-situ calibration refreshes to be performed at the push of a button without removing the DUT or re-connecting calibration standards. CalPods are designed for any measurement situation where it is desirable to ensure that a valid calibration is present before recording measurement data. For example, they are useful for removing environmental effects such as cable movement and thermal-based changes of cables, connectors, and adapters, as well as connector and switch-matrix repeatability errors. The modules are especially useful in temperature, or thermal-vacuum chamber testing. CalPod modules are equipped with 2.92 mm connectors.

- 85530B 20 GHz ambient-temperature CalPod
- 85531B 20 GHz temperature-compensated CalPod
- 85532B 20 GHz thermal-vacuum compatible CalPod
- 85540B 40 GHz ambient-temperature CalPod
- 85541B 40 GHz temperature-compensated CalPod
- 85542B 40 GHz thermal-vacuum compatible CalPod
- 85523B CalPod controller (provides control for up to 4 CalPods)
- 85556A CalPod drive-cable splitter (allows control for up to 12 CalPods)
- 85554A CalPod drive cable extension (10-meter cascadable extension cable)
## System Requirements for M980xA Control

<table>
<thead>
<tr>
<th>Requirement 1</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating systems</td>
<td>Windows 7 SP1 (^2) or Windows 10 (64-bit only)</td>
