

Keysight Supports the UN SDGs

United Nations Sustainable Development Goals

Corporate Social Responsibility Vision

Keysight's Corporate Social Responsibility (CSR) vision is to build a better planet by accelerating innovation to connect and secure the world and by employing a global business framework of ethical, environmentally sustainable, and socially responsible operations. To achieve this, Keysight's business and CSR efforts are synergistic in achieving the company's vision of creating long-term value for business stakeholders while striving to positively impact the global community through its solutions, services, and the CSR program. With focused actions in community prosperity across governance, environmental, and social aspects, Keysight's CSR efforts are well-aligned with the charter of the **United Nations' Sustainable Development Goals (UN SDGs)**¹.

SUSTAINABLE DEVELOPMENT GOALS

WE SUPPORT

Furthering our commitment to social responsibility and advancing the UN SDGs for the future, Keysight is a **signatory of the UN Global Compact**. Their universal principles on human rights, labor, environment, and anti-corruption align with our values and operational approach.

Key Impact Goals Focus Meaningful Support for Specific UN SDGs

Keysight's CSR efforts strive to strengthen global communities, support educational development, and help enable a sustainable future, all while maintaining ethical global business governance practices. The company tracks targeted key impact goals in environmental sustainability, community engagement and corporate citizenship, and ethical business and governance, which align to specific UN SDGs.

Environmental sustainability

Keysight has set environmental sustainability targets for Net Zero greenhouse gas emissions in company operations (scopes 1 and 2) by the end of fiscal year 2040 and to achieve our near-term science-based targets (SBTs) covering scopes 1, 2, and 3 emissions. These targets are aligned to UN SDG 13 Climate Action and are in line with the Paris Agreement's preferred goal to limit global warming to 1.5 degrees Celsius. Keysight's near-term SBTs were approved by the Science Based Targets initiative (SBTi) in October 2023.

Community engagement and corporate citizenship

Keysight's social impact goals cross community prosperity and science, technology, engineering, and math (STEM) education engagement.

Aligned to UN SDG 11 Sustainable Cities and Communities, Keysight's community engagement efforts strive to strengthen local and global communities in which we do business through efforts such as philanthropic giving, employee volunteerism, community sponsorships, donations, and university research and engagement programs.

Our STEM education engagement goal is aligned to UN SDG 4 Quality Education, . Through these efforts, Keysight nurtures future engineers and technology workers by engaging primary, secondary, and university-level students in STEM education via efforts such as Keysight After School, community education events, and access to donated and discounted Keysight solutions at universities. In addition, Keysight invests in partnerships with targeted education programs to support a diverse and skilled future workforce.

Ethical business and governance

In the ethical business and governance space, Keysight's goal aligns with UN SDG 16 Peace, Justice and Strong Institutions. The company supports ethical operations and business commitments with robust governance of our Standards of Business Conduct, corporate policies, and environmental, health and safety programs, for example.

Keysight is pleased to report that progress has been made on our key impact goals in fiscal year 2024:

Environmental sustainability	Community engagement and corporate citizenship		Ethical business and practice
Progress Made toward net zero emissions in company operations by end fiscal year 2040	\$295M+ in value committed to strengthening communities, exceeding the goal of \$250M	4.4M+ students, future engineers, and technology skill learners engaged through STEM education, exceeding the goal of 2M	Zero material negative impacts to the income statement from CSR-related efforts, meeting goal
13 CLIMATE ACTION 	11 SUSTAINABLE CITIES AND COMMUNITIES 	4 QUALITY EDUCATION 	16 PEACE, JUSTICE AND STRONG INSTITUTIONS 

²Keysight uses the following definition of underrepresented minorities: employees in the US who identify as Black, African American, Hispanic, Latino, Asian, Pacific Islander, Native Hawaiian, Native American, Alaska native, or two or more races, or as lesbian, gay, bisexual, or transgender.

Keysight will endeavor to continue making progress in these important areas, announcing goals that maintain our support of the UN SDGs, as noted in our annual [CSR Progress Report](#).

Broad Keysight CSR Efforts Further Support UN SDGs

Beyond our key impact goals, Keysight organizes CSR efforts across six foundational pillars – ethical governance, the environment, responsible sourcing, our people, communities, and our solutions – with actions that align in some way with all 17 of the UN SDGs. The following are some examples of efforts included in each of the pillars.

See appendix for more information on how Keysight's six foundational pillars align with the UN SDGs.

Ethical Governance

Keysight is committed to conducting business in an ethically responsible manner, with strategic and operational policies, procedures, and values that support transparency, sustainability, and legal compliance; this commitment underpins all our foundational pillars.

- Through Keysight's **Standards of Business Conduct (SBC)**, employees abide by uncompromising integrity in all their dealings on behalf of the company. This includes the company's ethical and legal obligations related to anti-bribery and anti-corruption, labor, human rights, health and safety, and the environment to name a few.
- Employees are encouraged to speak up if they have concerns or questions regarding the SBC through various reporting mechanisms and Keysight's open door policy.

The Environment

Keysight prioritizes natural resource conservation, greenhouse gas (GHG) emissions reduction, waste and water minimization, and pollution prevention. We partner with our suppliers and contractors to better achieve these goals.

- 5.8-megawatt (MW) peak solar rooftop at Penang, Malaysia.
- One MW peak solar carport at our headquarters facility in Santa Rosa, California.
- Renewable electricity from onsite solar systems in Bochum, Germany and Telford, United Kingdom.
- Installation of window solar film at several sites globally, which contributes to heat gain reduction in warmer months and heat loss prevention in cooler months.
- Goat and sheep grazing for all year-round natural vegetation control and to actively pursue fire preparedness and prevention at Santa Rosa, California.
- Native grass that requires less water and energy to maintain replaced non-native grasses in Colorado Springs, Colorado.
- Keysight operations in Penang, Malaysia converts cafeteria waste to reusable compost.
- Single used plastics have been discouraged at many of our sites, where we have moved to using wooden stirrers, compostable cutlery, napkins, and to-go-boxes.
- Electric Vehicle (EV) charging stations available for employee use at several Keysight sites.
- Germany and UK sites offer a bicycle and e-bike tax incentive leasing program to encourage low-carbon employee commuting.

- Many sites employ sustainable landscaping projects, recycling bins, composting and energy efficient building systems to minimize the impact of business operations on the local environment.
- Sensor-based systems that react to environmental conditions dim lights and help conserve energy when not needed.
- Keysight uses a **General Specification for the Environment (GSE)** directive to set restrictions for hazardous substances in materials and components that are used in our products.

Responsible Sourcing

Keysight has a strong partnership with strategic suppliers to ensure mutual success and commitment to leadership in sustainable practices, technology, and business operations.

- The **Supplier Code of Conduct** (the Code) establishes Keysight's expectations for its suppliers, including ethical business practices, social responsibility, environmental sustainability, and product quality. The Code principles are based on the Responsible Business Alliance (RBA) Code of Conduct, and we expect our suppliers and sub-tier suppliers to operate in accordance with this approach.
- Keysight has a proactive Small Business Engagement program which focuses on procurement of materials, components, equipment, supplies and services from Small Businesses. These sourcing opportunities expand supply chain partnerships with small disadvantaged, women-owned, Hub-Zone, and veteran-owned businesses. Keysight is a participant of the Responsible Minerals Initiative (RMI), and source minerals in accordance with the Organization for Economic Co-operation and Development (OECD) Guidance. We require our suppliers to implement reasonable measures ensuring that minerals, such as conflict minerals (tantalum, tin, tungsten, and gold) and other minerals (cobalt and mica), contained in the products, parts, components, and materials they supply to Keysight, are "Democratic Republic of Congo (DRC) conflict-free" and do not directly or indirectly finance or benefit armed groups that are the perpetrators of serious human rights abuses in these regions or an adjoining country.

Our People

Keysight is an equal opportunity employer with an ongoing commitment to people and to fair employment practices. Our personnel policies and practices are built on core values, which include a strong belief that all employees should be treated with dignity and respect. Keysight values a work environment where all employees enjoy challenging assignments, development opportunities, competitive salaries, and a safe environment.

- Keysight sponsors Employee Network Groups (ENGs) globally to support and promote inclusion and a strong sense of belonging for all employees. ENGs are voluntary, employee-led groups, open to all employees, that align with Keysight's business goals.
- Many Keysight locations offer on-site gyms, healthy eating options, and fitness activities for employees.
- At the Santa Rosa, CA site, the campus cafeteria uses vegetables cultivated and harvested from an on-site garden for employee meals; and employees are offered discounted Sonoma County Regional Park memberships.
- Through the Employee and Family Assistance Program, confidential and individual counseling is made available for employees and their families.
- Many employees utilize alternative work arrangements, such as part-time, telecommuting, job-shares, and variable work schedules.

- Learning at Keysight directly aligns with Keysight's business strategy. Learning drives professional growth and continuous improvement, helps create a strong leadership pipeline, and promotes company-wide development.

Communities

Keysight contributes to the communities where the company operates, as well as local and global volunteer efforts and supporting numerous charitable and educational organizations.

- Keysight employees worldwide volunteer with STEM education initiatives like Keysight After School, various STEM education partnerships, local student science events, and more, to support access to a quality education for a skilled future workforce.
- To help educate the next generation, the company supports donations and discounts of Keysight solutions to universities and Keysight employees help universities with grant writing, guest lectures, professor visits, technical hands-on training, career talks, and partnerships.
- Through the Employee Giving Program, employees can donate annually to a myriad of charitable organizations which support various UN SDGs. In North America, employees have a choice of hundreds of charitable organizations to donate directly to and receive a matching Keysight donation (up to a targeted threshold). Employees are also permitted four hours a month of management-approved paid time off for volunteerism.

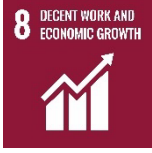

Our Solutions

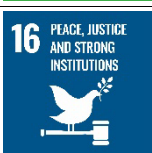

Keysight helps build a better planet through our sustainably developed electronic measurement solutions that accelerate innovations to change lives, secure the world and connect people across the globe.

- Keysight empowers the clean tech revolution by providing solutions for automotive, energy, network, communications, and Internet of Things (IoT) companies to design, test, manufacture, and monitor next-generation environmentally sustainable product and service offerings.
- Keysight supports social impact and wellness by providing solutions that test and validate designs, simulate and measure real-world conditions, and monitor infrastructure developments. The company also provides equipment, software, and resources to prepare tomorrow's engineers for the next technological revolutions.
- Keysight solutions test performance, validate security, and monitor deployments of these technologies in real-time. This enables our customers to find and fix vulnerabilities before they impact operations, thereby maintaining end user safety, security and privacy as applications are scaled to connect and secure the planet.
- Keysight contributes to a Circular Economy by designing and producing solutions that support an extensive use phase, of up to 40 years active service and supported by our calibration, repair, and remarketing services.

Appendix – UN SDGs supported by Keysight CSR efforts

Here are examples of where efforts in our six foundational pillars provide generalized support to various UN SDGs.

	Ethical governance	The environment	Responsible sourcing	Our people	Communities	Our solutions
 1 NO POVERTY					<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
 2 ZERO HUNGER					<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
 3 GOOD HEALTH AND WELL-BEING				<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
 4 QUALITY EDUCATION				<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
 5 GENDER EQUALITY	<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
 6 CLEAN WATER AND SANITATION	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
 7 AFFORDABLE AND CLEAN ENERGY		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
