State & Local Government

Introduction

This case study of a state & local government is based on an August 2016 survey of Ixia visibility solutions customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

> "We use the system to assist in monitoring all critical traffic on our network. This provides a central place that all of our network and security tools can be located."

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Ixia visibility solutions:

- Operational challenges Ixia helps solve:
    - Lack of network diagnostics
    - Network blind spots

Use Case

The key features and functionalities of Ixia visibility solutions that the surveyed organization uses:

- Using Ixia solutions for:
    - Network performance management
    - Forensics and packet capture
    - Resilient inline security tools
- Currently using the following visibility product or feature:
    - Network Packet Brokers

Results

The surveyed organization achieved the following results with Ixia visibility solutions:

- Top benefits experienced after implementing Ixia:
    - Improved overall security posture
    - Improved network and application reliability and performance
- Reduced the traffic load on their monitoring or security tools by almost 40% with Ixia's visibility solutions

Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Organization Size:
State & Local

Industry:
Government
