

Your business depends upon delivering

AMAZING

customer experiences

The

INFRASTRUCTURE

needs to be

Fast

RELIABLE

Secure

Of the **Mean Time to Repair** is the time taken to identify there is an issue.

Improve your visibility and security with an Ixia visibility architecture consisting of:

3 Design Frameworks

1

End-to-end Network, App & Security visibility
(76% of enterprises don't have this capability.)

This helps reduce MTTR by up to 80%

2

Harden resilience of inline security tool deployments
(79% of enterprises are missing this sort of protection.)

Customers can experience up to a 10x Return on Investment

3

Continuous SLA and End-User Experience monitoring
(Less than 10% of enterprises have this capability.)

Reduce time to recognize problems by up to 48%

Ixia's **IxVision** is the industry's most deployed visibility architecture and includes a set of easy-to-use frameworks that ensure **total visibility**.

IxVision has demonstrated the ability to deliver a

100% return on your investment
