

Keysight 8487D Option H84

Product Note

The Keysight 8487D Option H84 is a standard model 8487D that has been calibrated in the Standards Lab at the following frequencies:

50, 100, 300, 500, 1500, 12400, and 34500 MHz; from 1000 to 18000 MHz at 1000 MHz intervals; from 18500 to 26500 MHz at 500 MHz intervals; and from 27000 to 50000 MHz at 1000 MHz intervals.

In all other respects this instrument is identical to the standard instrument specifications.

Inspect the shipping container. If the container or packing material is damaged, it should be kept until the contents of the shipment have been checked mechanically and electrically. If there is physical damage please notify the nearest Keysight Technologies office. Keep the damaged shipping materials (if any) for inspection by the carrier and a Keysight Technologies representative.

To contact Keysight for sales and technical support, refer to the Keysight worldwide website at: www.keysight.com/find/assist.
