

Power Integrity Boot Camp for Designers

with Keysight PathWave ADS

with solutions partner

AGENDA

15 min **Welcome**

60 min **Flat Target Z Design Process**

- PI Basics, Target Z, Step Load, DeCap Selection, Rogue Waves

45 min **Measuring, Modeling, Simulating Capacitors and Inductors**

- 2-Port Shunt Impedance Measurement, PCB Mounting Inductance, RLC Measured Model Extraction

15 min **Measurement Tools**

60 min **Lunch**

45 min **DC-DC Converter Selection and Modeling**

- Current mode vs. voltage mode, state Based Average Measured Model, Harmonic Balance for Large and Small Signal Transients

45 min **DeCap Optimization with PCB AC Parasitics, DC IR Drop, and Thermal Considerations**

- Calculating C for Flat Z, Parallel Capacitor Parasitics, PIPro DeCap Optimizer, DC IR Drop, Electrothermal

60 min **Hands-On Simulation and Measurement Demo Station Networking**
