

## Procurement Policy

The intent of Keysight Technologies, Inc. is to purchase industry standard materials and services at worldwide competitive prices from qualified suppliers. The share of business a supplier could receive for any one component/service group will be determined by an evaluation. This evaluation will yield the best supplier meeting Keysight's needs in the following areas:

- Price leadership
- Lead times
- Quality
- Reliability
- Delivery
- Long-term technical direction
- Environmental, Social and Governance
- Flexibility in meeting our changing needs (both present and future)
- Long-term relationships

This evaluation is referred to as TQRDCE, which stands for Technology, Quality, Responsiveness, Delivery, Cost, and Environmental, Social and Governance. Keysight plan to nurture relationships with each supplier, so that these relationships will be rewarding for all parties. At the same time, we require supplier to run their businesses in efficient, cost-effective fashion that will allow them to be competitive in the worldwide market.

Keysight's practice is to procure any services or operational materials by asking qualified suppliers to submit competitive quotations. Keysight then awards an increasing share of business to those suppliers offering the greatest continuing value to Keysight relative to the abovementioned factors.

Those suppliers that continue to serve Keysight throughout the years as recommended suppliers and are industry leaders in technology, quality, responsiveness, delivery, cost and environmental, social and governance will have the opportunity for an open dialogue with Keysight in all business areas including terms, conditions and prices. This allows cost dialogues to occur when appropriate and fosters long-term relationships.
